PLACEMENT TRAINING QUESTIONS (2) FOR UPCOMING DRIVE- KAAR TECHNOLOGIES & HBS

1. The following bar graph shows the percentage of voters of different age group from five different cities of India who casted their votes in Parliament election in 2014. The total no. of voters is also mentioned with each city. Study the bar graph carefully to answer the questions that follow.

Find the average no. voters of age groups (30-40) years from all cities together.

A. 17,000
B. 15,500
C. 17,650
D. 16,460
E. 19,000

2. A & B can separately finish the work in 30 days and 50 days respectively. They worked together and A left the work, so B complete the remaining work in 10 days. Find after how many days A left the work?

A) 10days
B) 12days
C) 15days
D) 20days
E) 18days

3. log ($x2 – 6x + 6$) = 0

(a) 5

(b) 1
(c) Both (a) and (b)

(d) 3 and 2

4. Find the value of {[(3@4)!(3#2)] @ [(4!3)@(2#3)]}.

(a) –0.75
(b) –1
(c) –1.5
(d) –2.25

5. How many liters of water can filled in a tank of length, breadth and height of 4m,3 m and 1.5 m respectively?
   (A) 20000 lt. **(B) 18000 lt**. (C) 22000 lt. (D) 16000 lt.
6. A 5 cm cube is cut into as many 1 cm cubes as possible. What is the ratio of the surface area of the original cube to that of the sum of the surface areas of all the smaller cubes?
   (A) 2:3 **(B) 1:5** (C) 2:7 (D) 1:8
7. A drum is full of water. Diameter of the drum is 35cm. The level of water will be dropped by how much, if 11 litres of water is taken out:
   (A) 40/7 **(B) 80/7** (C) 70/9 (D) 13/8

8. The volume of a circular cone is 100p cm3 and its height is 12cm. What is the slant height?
   A)13 cm B)15 cm C)20 cm D)12 cm

9. A right triangle with sides 3 cm, 4 cm and 5 cm is rotated the side of 3 cm to form a cone. The volume of the cone so formed is**:**
   a) 12π cm3 b) 15 π cm3 c) 16 π cm3 d) 20π cm3

10. In a shower, 5 cm of rain falls. The volume of water that falls on 1.5 hectares of ground is:

a) 75 cu. m **b) 750 cu. m** c) 7500 cu. m d) 75000 cu. m

11. After measuring 100m of a rope, it was discovered that the metre rod was 2cm longer. The true length of the rod is
A)95m **B)98m** C)96m D)93m

12. A circle is drawn circumscribing a rectangle of sides 8cm and 6cm, find the area of the circle
A)78.5cm2 B)82.7cm2 C)65.4cm2 D)54.9cm2

13. If the sides of a equilateral triangle is increased by 10% , 30%and 60%then a new triangle is formed. By what % perimeter of the triangle is increased ? A)40.50% B)32.45% **C)33.33%** D)35.67%

14. The mean annual salary paid to all employees was Rs.5000.The mean annual salary paid to all male and female workers were Rs.5200 and Rs.4200.The percentage of female worker in the company is
a)80% b)20% c)60% d)40% e)None of these

15. The passing marks in an examination is 40%.If Ashok gets 88 marks and is declared failed by 10 marks, then the maximum mark in the examination is
a)240 b)242 **c)245** d)246 e)None of these

16. In a company of 2000 employees 60% are males of whom 20% are programmers. If of all the employees, 25% are programmers then what percent of the females of the town are male?
a) 21.5 **b) 32.5** c) 31.5 d) 41.5

17. The price of the book is increased by 25% and then reduced by 25%. What is the final price of the book?
a) 91.75 b) 92.75 c) 95.75 **d) 93.75**

18. The price of an shirt was increased by r%. Later the new price was decreased by r%. If the latest price was rs. 1 then what is the original price?
    a) r b) 2r c) 100/(100-r2) **d) 10000/(10000-r2)**
19. Raju has made an investment in the share market. He had the income in the year 2009 such that he had earned a profit of 20% on his investment in the business. In the year 2010 his investment was less by rs. 5000 but still he had the same income as that in 2009. Thus the profit % earned in 2009 increased by 5%. What was raju's investment?
    a) 105,000 b) 125,000 c) 135,000 d) 102,500
20. Two ships are sailing in the sea on the two sides of a lighthouse. The angle of elevation of the top of the lighthouse is observed from the ships are 30° and 45° respectively. If the lighthouse is 100 m high, the distance between the two ships is:

21. A man standing at a point P is watching the top of a tower, which makes an angle of elevation of 30º with the man's eye. The man walks some distance towards the tower to watch its top and the angle of the elevation becomes 60º. What is the distance between the base of the tower and the point P?
    a. 43 units b. 8 units c. 12 units **d. Data inadequate** e. None of these
22. The angle of elevation of a ladder leaning against a wall is 60º and the foot of the ladder is 4.6 m away from the wall. The length of the ladder is:

23. An observer 1.6 m tall is 203 away from a tower. The angle of elevation from his eye to the top of the tower is 30º. The heights of the tower is:

a. 21.6 m b.23.2 m c.24.72 m d.None of these

24. From a point P on a level ground, the angle of elevation of the top tower is 30º. If the tower is 100 m high, the distance of point P from the foot of the tower is:

a. 149 m b. 156 m **c. 173 m** d. 200 m

25. Mark is working with a realtor to find a location for the toy store he plans to open in his town. He is looking for a place that is either in, or not too far from, the center of town and one that would attract the right kind of foot traffic. Which of the following locations should Mark's realtor call to his attention?

A. a storefront in a new high-rise building near the train station in the center of town whose occupants are mainly young, childless professionals who use the train to commute to their offices each day.

B.a little shop three blocks away from the town's main street, located across the street from an elementary school and next door to an ice cream store

C.a stand-alone storefront on a quiet residential street ten blocks away from the town's center

D.a storefront in a small strip mall located on the outskirts of town that is also occupied by a pharmacy and a dry cleaner

A.A **B.B** C.C D.D

26. Rita, an accomplished pastry chef who is well known for her artistic and exquisite wedding cakes, opened a bakery one year ago and is surprised that business has been so slow. A consultant she hired to conduct market research has reported that the local population doesn't think of her shop as one they would visit on a daily basis but rather a place they'd visit if they were celebrating a special occasion. Which of the following strategies should Rita employ to increase her daily business?

A. making coupons available that entitle the coupon holder to receive a 25% discount on wedding, anniversary, or birthday cakes

B. exhibiting at the next Bridal Expo and having pieces of one of her wedding cakes available for tasting

C. placing a series of ads in the local newspaper that advertise the wide array of breads

D. moving the bakery to the other side of town.

27. Mrs. Jansen recently moved to Arizona. She wants to fill her new backyard with flowering plants. Although she is an experienced gardener, she isn't very well-versed in what plants will do well in the Arizona climate. Also, there is a big tree in her backyard making for shady conditions and she isn't sure what plants will thrive without much direct sunlight. Her favorite gardening catalog offers several backyard seed packages. Which one should Mrs. Jansen choose?

A. The Rainbow Collection is ideal for North-east gardens. It includes a variety of colorful perennials that thrive in cool, moist conditions.

B. The Greenhouse Collection will blossom year after year if planted in brightly lit locations and watered regularly.

C. The Tree house Collection will provide lush green plants with delicate colorful flowers that thrive in shady and partially shady locations.

D. The Oasis Collection includes a variety of perennials that thrive in dry climates and bright sunlight.

28. A study of native born residents in Newland found that two-thirds of the children developed considerable levels of nearsightedness after starting school, while their illiterate parents and grandparents, who had no opportunity for formal schooling, showed no signs of this disability.

If the above statements are true, which of the following conclusions is most strongly supported by them?

A) Only people who have the opportunity for formal .....schooling develop nearsightedness.

B) The nearsightedness in the children is caused by the .....visual stress required by reading and other class work.

C) Both A and B

D) None

29. Although most of the fastest growing jobs in today's economy will require a college degree, many of the new jobs being created-from home health aide to desktop publisher-require knowledge other than that gained from earning a degree. For workers in those jobs, good basic skills in reading, communigreion, and mathematics play an important role in getting a job and developing a career.

From the information given above it can be validly concluded that, in today's economy,

A) skills in reading, communigreion, and mathematics play an important role in developing a career as a desktop publisher

B) the majority of the new jobs being created require knowledge other than that gained from earning a college degree

C) Both A and B

D) None

Directions 26 -30.In each question below are given two statements followed by two conclusions numbered I and II. You have to take the given two statements to be true even if they seem to be at variance from commonly known facts. Read the conclusion and then decide which of the given conclusions logically follows from the two given statements, disregarding commonly known facts.

Give answer:

(A) If only conclusion I follows (B) If only conclusion II follows

(C) If either I or II follows (D) If neither I nor II follows and (E) If both I and II follow.

30. **Statement:** A large number of people in ward X of the city are diagnosed to be suffering from a fatal malaria type.

Courses of Action: The city municipal authority should take immediate steps to carry out extensive fumigation in ward X.The people in the area should be advised to take steps to avoid mosquito bites.

A. Only I follows B. Only II follows C. Either I or II follows

D. Neither I nor II follows **E. Both I and II follow**

31. Statements: No women teacher can play. Some women teachers are athletes.

Conclusions:1) Male athletes can play. 2) Some athletes can play.

A. Only conclusion I follows B. Only conclusion II follows

C. Either I or II follows **D. Neither I nor II follows**

E. Both I and II follow

32. Statements: All bags are cakes. All lamps are cakes.

Conclusions:

1.Some lamps are bags. 2.No lamp is bag.

A. Only conclusion I follows B. Only conclusion II follows

C. Either I or II follows D. Neither I nor II follows

E. Both I and II follow

33. Statements: All mangoes are golden in color. No golden-colored things are cheap.

Conclusions:

1.All mangoes are cheap. 2.Golden-coloured mangoes are not cheap.

A. Only conclusion I follows **B. Only conclusion II follows**

C. Either I or II follows D. Neither I nor II follows

E. Both I and II follow

34. Statements: Some kings are queens. All queens are beautiful.

Conclusions: All kings are beautiful. All queens are kings.

A. Only conclusion I follows B. Only conclusion II follows

C. Either I or II follow **D. Neither I nor II follows**

E. Both I and II follow

35. **If 10 Carpenters working 4hours a day can make 320 chairs in 200 days, then no. Of chairs made by 16 carpenters in 32 days each working 6hours in a day**

A)120 B)122 **C)123** D)124 E)None of these

36. **6 men or 10 women can do a piece of work in 24 days.How long will 12men and 20 women take to finish the work?**

A)6 B)10 C)9 D)6 E)None of these

37. **A and B together can complete a piece of work in 6 days. If A alone can complete the work in 10 days.In how many days B alone can complete that work ?**

A)12 **B)15** C)13 D)10 E)None of these

38. **A can do a certain job in 14 days. B is 40% more efficient than A. How many days does B alone take to do the same job ?**

A)12 B)20 C)13 **D)10** E)None of these

39. **X can do a piece of work in 20 days and Y can do a piece of work in 30 days.They work together in 6 days then how much work left ?**

A)1/2 B)1/4 C)1/3 D)1/6 E)None of these

40. **12 men complete the work in 9 days.Ater they worked for 6days, 6 more men joined then how many days required to complete the remaining the work ?**

A)5 B)6 C)3 **D)2** E)None of these

41. **A is twice as good a workman as B, A and B together can complete a work in 12 days.In how many days B alone finish the work ?**

A)24 **B)36** C)12 D)48 E)None of these

42. **X and Y can do a piece of work in 18 days and 14 days..X started the work alone, after 3 days Y joined till the completion of work. How long they did the work ?(approximately)**

A)6 B)3 C)4 **D)7** E)None of these

A boat can travel 15 km downstream in 18 min. The ratio of the speed of the boat in still water to the speed of the stream is 4 : 1. How much time will the boat take to cover 10 km upstream?
A) 22 min B) 25 min **C) 20 min** D) 33 min E) 30 min

43. **Speed of a man in still water is 4 km/hr and the river is running at 2 km/hr. The total time taken to go to a place and come back is 4 hours. What is the distance travelled?**
A) 16 km B) 13 km C) 10 km **D) 6 km** E) 8 km

44. A boat takes 25 hours for travelling downstream from point A to point B and coming back to point C midway between A and B. If the velocity of the stream is 5 km/hr and the speed of the boat in still water is 10 km/hr, what is the distance between A and B?
A) 100 km B) 122 km C) 146 km D) 178 km **E) 150 km**

45. **A boat goes 6 km against the current of the stream in 2 hours and goes 8 km along the current in half hour. How long will it take to go 28.5 km in stationary water?**
A) 4 1/2 hours **B) 3 hours** C) 3 1/2 hours D) 4 hours E) None of these

46. **A man can row 48 km upstream and 56 km downstream in 12 hrs. Also, he can row 54 km upstream and 70 km downstream in 14 hrs. What is the speed of man in still water?**
A) 4 km/hr **B) 10 km/hr** C) 12 km/hr D) 15 km/hr E) 18 km/hr

47. **A boat takes 150 min less to travel 40 km downstream than to travel the same distance upstream. The speed of the stream is 4 km/hr. What is the downstream speed?**
A) 16 km/hr B) 12 km/hr C) 10 km/hr D) 8 km/hr E) None of these

48. **A man rows to a place 40 km distant and back in a total of 18 hours. He finds that he can row 5 km with the stream in the same time as 4 km against the stream. What is the speed of boat in still water?**
A) 4.5 km/hr B) 8 km/hr C) 5.5 km/hr D) 2 km/hr E) None of these

49. **In a stream running at 2 km/hr, a motorboat goes 6 km upstream and back again to the starting point in 2 hours. Find the speed of boat in still water.**
A) 9 km/hr B) 12 km/hr **C) 8 km/hr** D) 10 km/hr E) None of these

50. Statement: "You are hereby appointed as a programmer with a probation period of one year and your performance will be reviewed at the end of the period for confirmation." – A line in an appointment letter.

Assumptions:The performance of an individual generally is not known at the time of appointment offer.
Generally an individual tries to prove his worth in the probation period)
a) Only assumption I is implicit b) Only assumption II is implicit c) Either I or II is implicit
d) Neither I nor II is implicit **e) Both I and II are implicit**
