Questions (1-5):- Study the following table and Pie-Chart carefully and answer the following questions given below.

Number of students studying in different streams in six engineering colleges

Colleges	Computer Science	Electrical Engineering	Electronics	Civil	Mechanical	Others
M	250	320	160	272	128	150
N	120	210	200	150	180	220
O	220	150	220	160	200	120
P	180	170	140	128	100	172
Q	240	220	180	170	190	200
R	160	200	150	190	150	160

Pie-charts show the distribution of students in different states in colleges N and Q.

1. **How many students doing in civil engineering in College N, were from UP?**
   A. 35
   B. 60

C. 55
D. Can not be determined

Answer & Explanation

Answer – **D. Can not be determined**
Explanation :
Given data is not sufficient to calculate the answer.

2. **What is the difference between the number of students from Delhi in colleges N and Q?**
A. 34
B. 50
C. 60
D. 72

Answer & Explanation

Answer – **D. 72**
Explanation :
Total number of students in college N = 1080
Number of students from Delhi in college N = 1080 * (20/100) = 216
Total number of students in college Q = 1200
Number of students from Delhi in college N = 1200 * (12/100) = 144
Difference = 216 – 144 = 72

3. **What is the difference between the number of students pursuing computer science and those pursuing mechanical engineering in the given six colleges?**
A. 205
B. 224
C. 222
D. 220

Answer & Explanation

Answer – **C. 222**
Explanation :
Number of students pursuing computer science = 250 + 120 + 220 + 180 + 240 + 160 = 1170
Number of students pursuing mechanical engineering = 948
Difference = 1170 – 948 = 222

4. **By what percentage is the number of students from Punjab in college N more/less than those from Maharashtra in college Q?**

A. 50%
B. 40%
C. 20%
D. 30%

Answer & Explanation

Answer – **B. 40%**
Explanation :
Number of students from Punjab in college N = 1080 * (10/100) = 108
Number of students from Maharashtra in college Q = 1200 * (15/100) = 180
Percentage = [(180 – 108)*100] = 40%

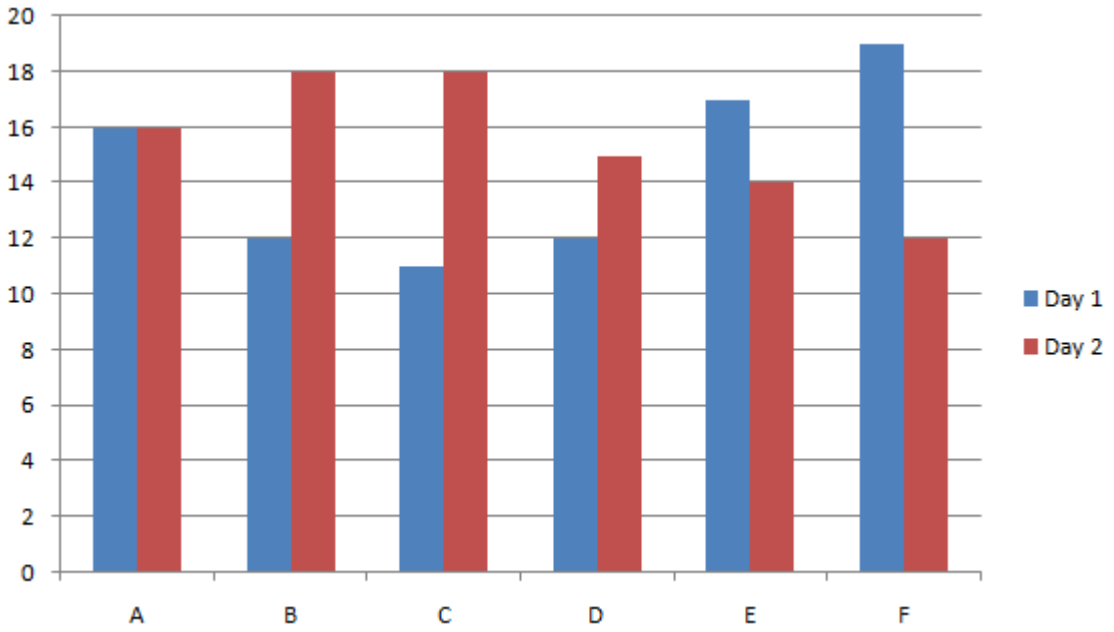

5. **The total number of students in college R forms approximately what percentage of the total number of students in colleges M, N and P together?**
A. 25%
B. 33%
C. 31%
D. 35%

Answer & Explanation

Answer – **C. 31%**
Explanation :
Total number of students in colleges M, N and P = 1280 + 1080 + 890 = 3250
Total number of students in college R = 1010
Percentage = [(1010/3250)*100] = 31%(approximately)

Questions (6-10):- Study the following bar graph and table carefully and answer the following questions given below.

Time taken to travel (in hours) by six vehicles on two different days.

Distance covered by six vehicles on each day

Vehicle	Day 1	Day 2
A	832	864
B	516	774
C	693	810
D	552	765
E	935	546
F	703	636

6. **Which of the following vehicles travelled at the same speed on both the days?**
   A. Vehicle A
   B. Vehicle B
   C. Vehicle C
   D. Vehicle D

   Answer & Explanation

Answer – **B. Vehicle B**
Explanation :
Speed of vehicle A on day 1 = 832/16 = 52kmph
Speed of vehicle A on day 2 = 864/16 = 54kmph
Speed of vehicle B on day 1 = 516/12 = 43kmph
Speed of vehicle B on day 2 = 774/18 = 43kmph
Speed of vehicle C on day 1 = 693/11 = 63kmph
Speed of vehicle C on day 2 = 810/18 = 45kmph
Speed of vehicle D on day 1 = 552/12 = 46kmph
Speed of vehicle D on day 2 = 765/15 = 51kmph
Vehicle B travelled at the same speed on both the days

7. **What was the difference between the speed of vehicle A on day 1 and the speed of the vehicle on the same day?**
A. 22 kmph
B. 11 kmph
C. 10 kmph
D. 13 kmph

Answer & Explanation

Answer – **B. 11 kmph**
Explanation :
Speed of vehicle A on day 1 = 832/16 = 52kmph
Speed of vehicle C on day 1 = 693/11 = 63kmph
Difference = 63-52 = 11kmph

8. **What was the speed (in m/s) of vehicle C on day 2?**
A. 12.5 m/s
B. 11.5 m/s
C. 10.5 m/s
D. 9.5 m/s

Answer & Explanation

Answer – **A. 12.5 m/s**
Explanation :
Speed of vehicle C on day 2 = 810/18 = 45kmph
Speed of vehicle C on day 2 = 45 * (5/18) = 12.5 m/s

9. **The distance travelled by vehicle F on day 2 was approximately what % of the distance travelled by it on day 1?**
A. 90%
B. 95%

C. 94%
D. 98%

Answer & Explanation

Answer – **A. 90%**
Explanation :
Percentage = (636/703)*100 = 90%

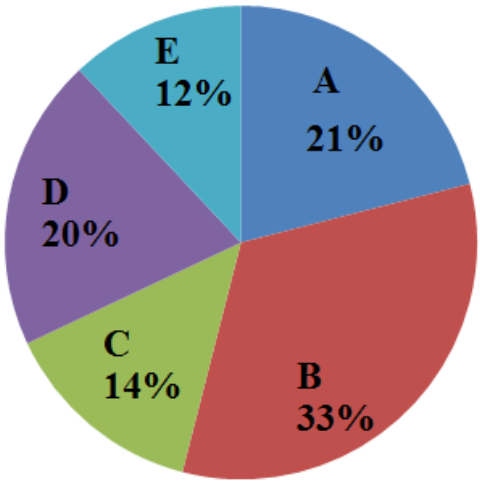

10. **What is the ratio of speeds of vehicle D and Vehicle E on day 2?**
A. 14:15
B. 17:13
C. 15:16
D. 13:17

Answer & Explanation

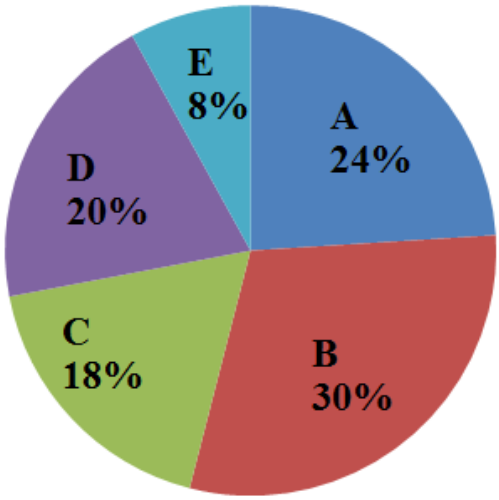

Answer – **B. 17:13**
Explanation :
Speed of vehicle D on day 2 = 51kmph
Speed of vehicle E on day 2 = 39kmph
Ratio = [Speed of vehicle D on day 2/Speed of vehicle E on day 2] = 51/39 = 17:13

(Q.no: 1-5). Refer to the Pie-charts and answer the given questions.

Total Number of employees (both male and female) in 5 companies in 2014 = 6300

Total Number of male employees in 5 companies in 2014 = 3600

1. **Only 25% of the members (both male and female) in company D have Full membership in IES. If the number of females in Company D who have full membership is 126, what percent of male members in Company D have full membership?**
   A.105/4 %
   B.103/4 %
   C.101/4 %
   D.107/4 %
   E.None of the Above

   Answer & Explanation

   Answer – **A.105/4 %**
   Explanation :
   Total = 6300
   Total number of employees in D = 20% of 6300 = 1260
   25% of D = 25% of 1260 = 315
   Female employees who have IES membership = 126
   Male employees who have IES membership = 315 – 126 = 189
   Total number of male employees in D = 720
   Required percentage = (189/720) * 100 = 105/4 %

2. **What is the average number of female members in Companies A, B and C?**
   A.564
   B.572
   C.568
   D.548
   E.None of the Above

   Answer & Explanation

Answer – **A.564**
Explanation :
Total = 6300
In Company A (both female and male) employees = 1323
In Company B (both female and male) employees = 2079
In Company C (both female and male) employees = 882
In Company A male employees = 864
In Company B male employees = 1080
In Company C male employees = 648
In Company A female employees = 459
In Company B female employees = 999
In Company C female employees = 234
(459 + 999 + 234)/3 = 564

3. **Number of male employees in companies A and C increased by equal number from 2014 to 2015. If the respective ratio between number of male numbers in company A and that in C in 2015 is 13:10, what is the number of male employees in company C in 2015?**
A.690
B.750
C.720
D.740
E.None of the Above

Answer & Explanation

Answer – **C.720**
Explanation :
864 + x / 648 + x = 13 / 10
x = 72
Number of male numbers in company C = 648 + 72 = 720

4. **What is the central angle corresponding to number of (both male and female) in company B?**
A.118.8°
B.112.6°
C.124.8°
D.116.4°
E.None of the Above

Answer & Explanation

Answer – **A.118.8°**
Explanation :
(33/100) * 360 = 118.8°

5. **Number of female members in company E is what percent less than number of male members in company B?**
   A. 160/3 %
   B. 170/3 %
   C. 140/3 %
   D. 190/3 %
   E. None of the Above

   Answer & Explanation

   Answer – **B. 170/3 %**
   Explanation :
   Number of female members in company E = 756 – 288 = 468
   (612/1080)*100 = 170/3%

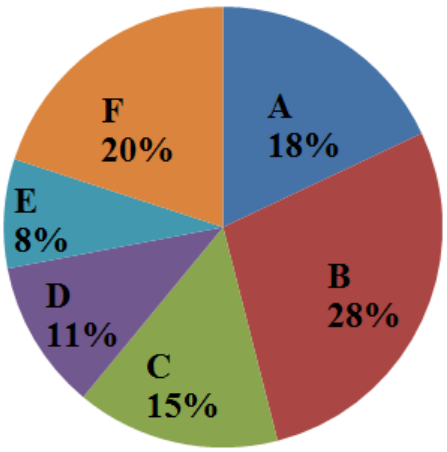

(Q.no: 6-10). Refer to the Pie-charts and answer the given questions.

Number of Intex laptops sold = 28000

Percentage of Intex Smartphones sold

Total number of Smartphones (Intex and Lneovo) sold = 48000

6. **The number of smart phones of both types sold by stores A and C is more than that sold by sold by stores E and F by**
   A. 2500
   B. 2600
   c. 2000
   D. 2400
   E. None of these

   Answer & Explanation

   Answer – **D. 2400**
   Explanation :
   stores A and C 33/100 * 48000 = 15840
   stores E and F 28/100 * 48000 = 13440
   Difference = 2400

7. **What is the ratio between the number of Intex and Lenovo smartphones sold by store A?**
   A. 49 : 59
   B. 47 : 49
   C. 49 : 53
   D. 49 : 47
   E. None of these

   Answer & Explanation

   Answer – **A. 49 : 59**
   Explanation :
   Intex sold by store A = 14/100 * 28000 = 3920
   Lenovo sold by store A = Total – Intex
   Total = 18/100 * 48000 = 8640
   Intex = 3920

8640 – 3920 = 4720
3920 : 4720 = 49 : 59

8. **What is the respective ratio between the average number of Intex Smartphones sold by stores A, C and E and that sold by stores B, D and F?**
A. 3 : 4
B. 4 : 9
C. 9 : 16
D. 5 : 12
E. None of these

Answer & Explanation

Answer – **C. 9 : 16**
Explanation :
Intex Smartphones sold by stores A, C and E = [(36/100) * 28000]/3
Intex Smartphones sold by stores B, D and F = [(64/100) * 28000]/3
36 : 64 = 9 : 16

9. **By what percent is the number of Lenova smartphones sold by store B is more than that of Intex Smartphones sold by store E?**
A. 40%
B. 60%
C. 55%
D. 45%
E. None of these

Answer & Explanation

Answer – **B. 60%**
Explanation :
Total smartphones sold by store B = (28/100) * 48000 = 13440
Lenova = 13440 – 8960 = 4480
Intex laptops sold by store E = 2800
Difference = 4480 – 2800 = 1680
(1680/2800)*100 = 60%

10. **What will be the central angle corresponding to number of smartphones both kinds sold by stores C and F?**
A. 126°
B. 115°
C. 90°
D. 80°
E. 120°

Answer & Explanation

Answer – **A. 126°**
Explanation :
(35/100)*360 = 126°

Questions (1-5):- Refer to the table and answer the given questions.

Data related to number of candidates appeared and qualified in a competitive exam from 2 states during 5 years.

Year	Andhra Pradesh		Uttar Pradesh	
	Number of Appeared candidates	Percentage of Appeared candidates who qualified	Number of Appeared candidates	Percentage of Appeared candidates who qualified
2012	450	60%	___	30%
2013	600	43%	___	45%
2014	___	60%	280	60%
2015	480	70%	550	50%
2016	380	___	400	___

Note: Few values are missing in the table (indicated by __).
A candidate is expected to calculate the missing value, if it is required to answer the given questions on the basis of given data and information.

1. **Out of the number of qualified candidates from State Andhra Pradesh in 2014, the respective ratio of male and female candidates is 11:7. If the number of female qualified candidates from State Andhra Pradesh in 2014 is 126, what is the number of appeared candidates(both male and female) from State Andhra Pradesh in 2014?**
   A. 630
   B. 510
   C. 570

D. 650
E. 540

Answer & Explanation

Answer – **E. 540**
Explanation :
X — Male candidates
X = 126 * (11/7) = 198
Total Qualified Candidates = 198 + 126 = 324
Total Appeared Candidates = 324 * (100/60) = 540.

2. **Number of Appeared Candidates from State Uttar Pradesh increased by 100% from 2012 to 2013. If the total number of qualified candidates from State uttar Pradesh in 2012 and 2013 together is 408, what is the number of appeared candidates from State Uttar Pradesh in 2012?**
A. 380
B. 320
C. 340
D. 360
E. 300

Answer & Explanation

Answer – **C. 340**
Explanation :
x — Total number of appeared Candidates in 2012
2x — Total number of appeared Candidates in 2013
x*(30/100) + 2x*(45/100) = 408
120x/100 = 408 —> x = 340

3. **What is the difference between number of qualified candidates from State Andhra Pradesh in 2012 and that in 2013?**
A. 12
B. 14
C. 16
D. 18
E. 20

Answer & Explanation

Answer – **A. 12**
Explanation :
60% of 450 = 270
43% of 600 = 258
Difference – 12

4. **If the average number of qualified candidates from State Uttar Pradesh in 2014, 2015 and 2016 is 210, what is the number of qualified candidates from state Uttar Pradesh in 2016?**
   A. 191
   B. 195
   C. 183
   D. 187
   E. 179

   Answer & Explanation

   Answer – **D. 187**
   Explanation :
   Average no of qualified students in 2014,2015,2016 = 210
   Total no of qualified students in 2014,2015,2016 = 630
   Qualified students in 2016 = (630 – (60% Of 280 + 50% Of 550)) = 630 – 443 = 187

5. **If the respective ratio between number of qualified candidates from State Andhra Pradesh in 2015 and 2016 is 14:9, what is the number of qualified candidates from State Andhra Pradesh in 2016?**
   A. 252
   B. 207
   C. 216
   D. 234
   E. 198

   Answer & Explanation

   Answer – **C. 216**
   Explanation :
   x — Number of qualified candidates in 2016
   x = 336*(14/9) = 216

Questions (6-10):- Refer to the table and answer the given questions.

Data related to number of employees in 5 different companies in December, 2012

Company		Out of total number of employees

	Total number of Employees	Percentage of Science Graduates	Percentage of Commerce Graduates	Percentage of Arts Graduates
M	1050	32%	___	___
N	700	___	31%	40%
O	___	30%	30%	___
P	___	___	40%	20%
Q	___	35%	50%	___

I. Employees of the given companies can be categorised only in three types:
Science Graduates, Commerce Graduates and Arts Graduates
II. Few values are missing in the table (indicated by ___). A candidate is expected to calculate the missing value, if it is required to answer the given questions, on the basis of the given data and information.

6. **What is the difference between the number of Arts graduate employees and Science Graduates employees in Company N?**
   A. 87
   B. 89
   C. 77
   D. 81
   E. 73

   Answer & Explanation

   Answer – **C. 77**
   Explanation :
   Number of Arts graduate employees = 40% of 700 = 280
   Number of Science Graduates employees = 29% of 700 = 203
   Difference = 280 – 203 = 77

7. **The Average number of Arts graduate employees and Commerce graduate employees in Company Q was 312. what was the total number of employees in Company Q?**
   A. 920

B. 960
C. 1120
D. 1040
E. 1080

Answer & Explanation

Answer – **B. 960**
Explanation :
Average no of Arts graduate employees and Commerce graduate employees in Company Q = 312
Total no of Arts graduate employees and Commerce graduate employees in Company Q = 624
Total number of employees in Company Q = X
X = 624 * (100/65) = 960

8. **If the respective ratio between the number of Commerce graduate employees and Arts graduate employees in Company M was 10:7, what was the number of Arts graduate employees in M?**
A. 294
B. 266
C. 280
D. 308
E. 322

Answer & Explanation

Answer – **A. 294**
Explanation :
Number of Science Graduate employees = 32% of 1050 = 336
Number of Commerce Graduate employees and Arts graduate employees = 1050 -336 = 714
Number of Arts graduate employees in M = 714 * (7/17) = 294

9. **Total number of employees in Company N increased by 20% from December 2012 to 2013, If 20% of the total number of employees in Company N in December, 2013 was science graduates, what was the number of Science graduate employees in Company N in December 2013?**
A. 294
B. 266
C. 168
D. 252
E. 238

Answer & Explanation

Answer – **C. 168**
Explanation :
Total number of employees in Company N in 2013 = 840
Science graduate employees in Company N in December 2013 = 20% of 840 = 168

10. **Total number of employees in Company P was 3 times the total number of employees in Company O. If the difference between number of Arts graduate employees in Company P and that in Company O was 180, what was the total number of employees in Company O?**
A. 1200
B. 1440
C. 720
D. 900
E. 1080

Answer & Explanation

Answer – **D. 900**
Explanation :
Total number of employees in Company P = 3 times the total number of employees in Company O.
40% – 20% = 180
20% = 180
Total number of employees in Company o = 360 * (100/40) = 900

Questions(1-5):- Refer to the table and answer the given questions.

Companies	Branches	Total number of Employees	Ratio of Male to Female Employees	Percentage of Post Graduate Employees
A	16	2568	5 : 7	75%
B	18	2880	11 : 5	65%
C	14	2310	10 : 11	40%
D	22	3575	3 : 2	60%

E	13	2054	7 : 6	50%
F	17	2788	20 : 21	75%
G	24	3720	8 : 7	55%
H	21	3360	9 : 5	80%

1. **If the number of male post graduate employees in company H is 1800, what percent of the female employees in that particular company are post graduate?**
   A. 74%
   B. 76%
   C. 75%
   D. 73%
   E. 72%

   Answer & Explanation

   Answer – **A. 74%**
   Explanation :
   Number of Females in Company H = 3360 *(5/14) = 1200
   Number of Post graduate employees in Company H = 3360 *(80/100) = 2688
   Number of female post graduate employees in Company H = 2688 – 1800 = 888
   Required Percentage = (888 * 100)/1200 = 74%

2. **In which of the given companies is the percentage of women employees with respect to the total number of employees(both males and females) in that company the second lowest?**
   A. G
   B. B
   C. E
   D. H
   E. D

   Answer & Explanation

   Answer – **D. H**
   Explanation :
   Company A : ([7/12 * (2568)] / 2568)*100 = 58.33%
   Company B : ([5/16 * (2880)] / 2880)*100 = 31.25%
   Company C : ([11/21 * (2310)] / 2310)*100 = 52.38%
   Company D : ([2/5 * (3575)] / 3575)*100 = 40%
   Company E : ([6/13 * (2054)] / 2054)*100 = 46.15%
   Company F : ([21/41 * (2788)] / 2788)*100 = 51.21%

Company G : ([7/15 * (3720)] / 3720)*100 = 46.66%
Company H : ([5/14 * (3360)] / 3360)*100 = 35.71%

3. **What is the ratio of the total number of male employees in companies B and H together to the total number of female employees in Companies C and D together?**
A. 63 : 51
B. 51 : 48
C. 77 : 63
D. 69 : 44
E. 55 : 53

Answer & Explanation

Answer – **D. 69 : 44**
Explanation :
= [2880 * (11/16)/ 2310 * (11/21) + 3360 * (9/14)/ 3575 * (2/5)]
= (1980 + 2160)/(1210 + 1430) = 414/264 = 69:44

4. **What is the difference between the average number of post graduate employees in companies A, B and D together and the average number of post graduate employees in companies F, G and H?**
A. 272
B. 312
C. 294
D. 346
E. 289

Answer & Explanation

Answer – **C. 294**
Explanation :
Average number of post graduate employees in companies A, B and D = (1926 + 1872 + 2145)/3 = 5943/3 = 1981
Average number of post graduate employees in companies F, G and H = (2091 + 2046 + 2688)/3 = 6875/3 = 2275
Difference = 2275 – 1981 = 294

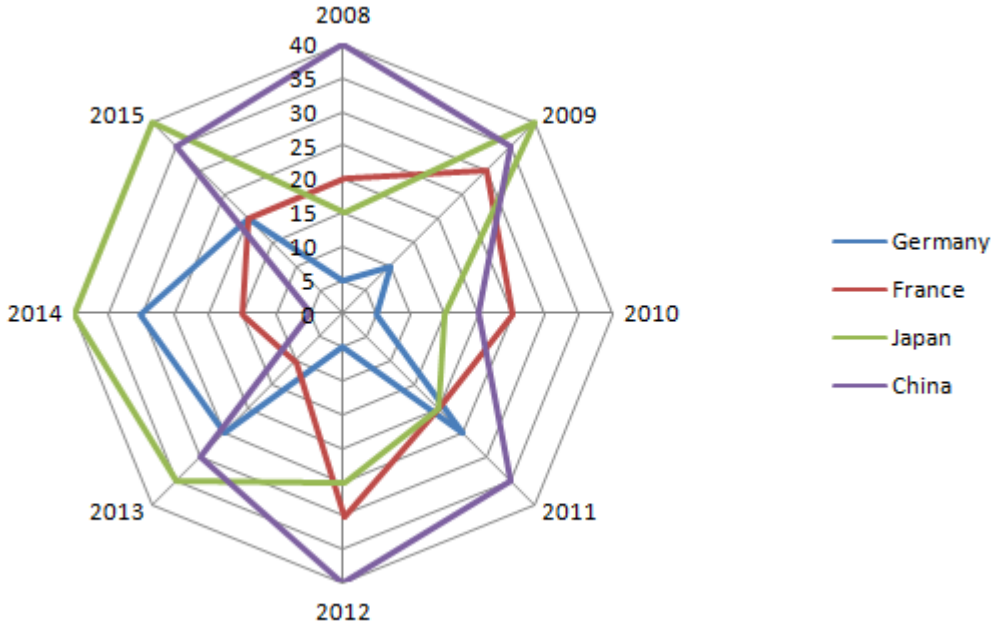

5. **Which of the given companies has the highest number of average employees per office?**
A. F
B. H
C. B
D. C
E. D

Answer & Explanation

Answer – **D. C**
Explanation :
Company A – 2568/16 = 160.5 ; Company B – 2880/18 = 160
Company C – 2310/14 = 165 ; Company D – 3575/22 = 162.5
Company E – 2054/13 = 158 ; Company F – 2788/17 = 164
Company G – 3720/24 = 155 ; Company H – 3360/21 = 160

Questions(6-10):- Study the following Radar Graph and answer the given questions

Number of new countries registered (in thousand) in four countries in various years.

1. **In which year is the average of the number of companies registered the maximum?**
   A. 2008
   B. 2010
   C. 2009
   D. 2011

   Answer & Explanation

   Answer – **C. 2009**
   Explanation :
   Average of the number of companies registered in 2008 = [5 + 20 + 15 + 40]*1000/4 = 20000
   Average of the number of companies registered in 2009 = [10 + 30 + 40 + 35]*1000/4 = 28750
   Average of the number of companies registered in 2010 = [5 + 25 + 15 + 20]*1000/4 = 16250
   Average of the number of companies registered in 2011 = [25 + 20 + 20 + 35]*1000/4 = 25000

2. **The number of companies registered in 2015 is what percentage more or less than the number of companies registered in the year 2008?**
   A. 44.44%
   B. 43.75%
   C. 22.22%
   D. 11.11%

   Answer & Explanation

   Answer – **B. 43.75%**
   Explanation :
   Number of companies registered in 2015 = [20 + 20 + 40 + 35]*1000 = 115000
   Number of companies registered in 2008 = [5 + 20 + 15 + 40]*1000 = 80000
   % = [(115000 – 80000)/ 80000]*100 = 43.75% more

3. **What is the ratio of the number of companies registered in Japan to that in China during 2008 to 2015?**
   A. 39:40
   B. 23:24
   C. 40:41
   D. 24:23

   Answer & Explanation

   Answer – **B. 23:24**
   Explanation :
   Number of companies registered in Japan during 2008 to 2015 = 230*1000 = 230000
   Number of companies registered in China during 2008 to 2015 = 240*1000 = 240000
   Ratio = 23:24

4. **The total number of companies registered in France is how much more or less than the total number of companies registered in China?**
   A. 34.14%
   B. 33.13%
   C. 29.16%
   D. 11.11%

   Answer & Explanation

   Answer – **C. 29.16%**
   Explanation :
   Total number of companies registered in France = 170*1000 = 170000
   Total number of companies registered in china = 240*1000 = 240000
   % = [(240000 – 170000)/ 240000]*100 = 29.16% less

5. **In which country is the average number of companies registered the maximum?**
   A. Germany
   B. Japan
   C. China
   D. France

   Answer & Explanation

   Answer – **C. China**
   Explanation :
   Average number of companies registered in France = 170000/4 = 42500
   Average number of companies registered in Germany = 125000/4 = 31250
   Average number of companies registered in Japan = 230000/4 = 57500
   Average number of companies registered in China = 240000/4 = 60000
   Average number of companies registered in China is the maximum

Study the following graph carefully to answer the given Questions

Name of the Magazine	No of Magazines Published	% of Magazine distributed among distributors	No of distributors working with the company
P	5000	100	10
Q	7500	95	8
R	8200	84	5
S	3600	90	7
T	5500	65	12
U	7900	75	6

1. **The no of magazines distributed by company R is what % of the no of Magazine distributed by Company U ?**
   A)124%
   B)116%
   C)120%
   D)104%

   Answer

   B)116%
   Explanation :
   R = (8200*84)/100 =6888
   U = (7900*75)/100 = 5925
   % = (6888/5925)*100 = 116.25% = 116%

2. **What was the average no of Magazine published by Company Q,S and T together ?**

A)5231
B)5545
C)5533
D)6543

Answer

C)5533
Explanation :Q+S+T/3 = 7500+3600+5500/3 = 5533.3 = 5533

3. **What was the difference between the no of magazine received by each distributor working with the Company Q and the no of magazine received by each distributor working with the company S ?**
A)428
B)432
C)564
D)389

Answer

A)428
Explanation :
Q = 7500*95/100 =7125 = 8 distributor
1 distributor = 7125/8 = 890.6 = 891
S = 3600*90/100 = 3240 = 7 distributor
1 distributor = 3240/7 = 462.8 = 463
Diff = 891-463 = 428

4. **Among the total no of magazine published by Company R, the ratio of banking and non banking magazine is 7:5. Find the no of banking Magazine distributed by Company R?**
A)5430
B)4390
C)3416
D)4783

Answer

D)4783
Explanation :Banking = 8200*7/12 = 4783

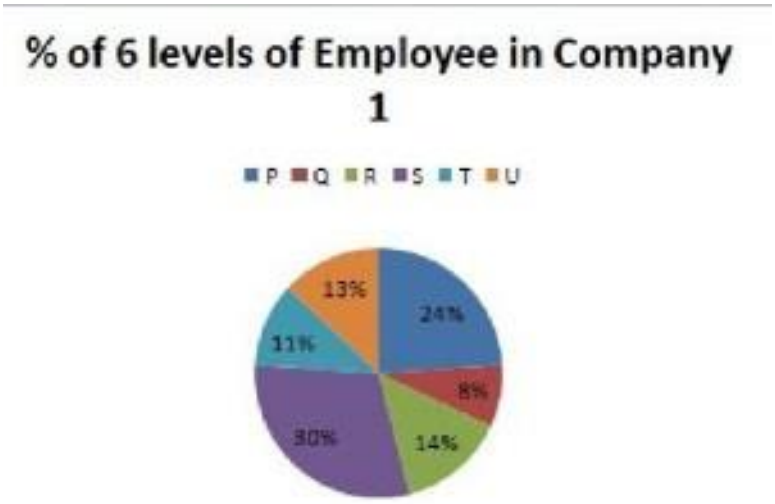

5. **The number of magazine distributed by Company U is what % more than the no of magazine distributed by Company P ?**
   A)15.5%
   B)20.7%
   C)18.5%
   D)25%

   Answer

   C)18.5%
   Explanation :
   P = 5000*100/100 = 5000
   U = 7900*75/100 = 5925
   % = (5925-5000/5000)*100 = 18.5%

. Study the following pie-charts and information to answer the given questions

Total no o f employee in Company 1 – 20400

Total no o f employee in Company 2 – 24800

1. **The number of P level employee in company 2 is approximately what percentage of the number of S level employee in company 1 ?**
   A)55%
   B)45%
   C)47%
   D)57%

   Answer

   Answer -D)57%
   Explanation :% =3472/6120 = 56.7 = 57%

2. **The number of R level employee in Company 1 is approximately equal to the number of which level employee in Company 2**
   A)U

B)S
C)T
D)R

Answer

Answer -A) U
Explanation :
Company 1
P level = (24*20400)/100 = 4896
Q level = (8*20400)/100 = 1632
R level = (14*20400)/100 = 2856
S level = (30*20400)/100 = 6120
T level = (11*20400)/100 = 2244
U level = (13*20400)/100 = 2652
Company 2
P level = (14*24800)/100 = 3472
Q level = (16*24800)/100 = 3968
R level = (32*24800)/100 = 7936
S level = (8*24800)/100 = 1984
T level = (18*24800)/100 = 4464
U level = (12*24800)/100 = 2976
Company 1 – R = 2856
Company 2 – U = 2976
This only approximately equal

3. **What is the total number of Q level employee in Company 1 is less than the Company 2 by approximately what percentage ?**
A)41.21%
B)41.12%
C)42.21%
D)42.12%

Answer

Answer -B)41.12%
Explanation :
Company 1 – Q = 1632
Company 2 – Q = 3968
% = (1632*100)/3968 = 41.12%

4. **The difference between the number of employees in the 2 companies of which level is maximum ?**
A)P

B)Q
C)R
D)S

Answer

Answer -C)R
Explanation :
Company 1 – R = 2856
Company 2 – R = 7936
7936 – 2856 = 5080

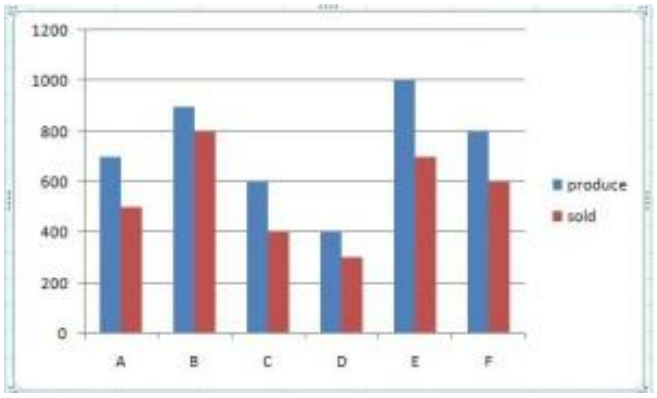

5. **What is the total number of P level employee in Company 1 and R level employee in Company 2 together ?**
A)14564
B)13789
C)12679
D)12832

Answer

Answer -D)12832
Explanation :
Company 1 – P = 4896
Company 2 – R = 7936
7936 + 4896 = 12832

Study the following graph carefully to answer the questions given

below

P : 700 900 600 400 1000 800
S: 500 800 400 300 700 600
A B C D E F

1. **What is the average number of units produce by all companies together ?(approx)**
   A)700
   B)720
   C)733
   D)740
   E)750

   Answer

   Answer -C) 733
   Explanation :
   Avg production = (700+900+600+400+1000+800)/6 = 733.33 = 733

2. **Which company had the lowest percentage of sales with respect to its production ?**
   A)Company A
   B)Company B
   C)Company C
   D)Company D
   E)Company E

   Answer

   Answer -C) Company C
   Explanation :
   A = (500×100)/700 = 71.42%
   B = (800×100)/900 = 88.88%

C = (400×100)/600 = 66.66%
D = (300×100)/400 = 75%
E = (700×100)/1000 = 70.%
F = (600×100)/800 = 75%

3. **What is the ratio of the total production of the company B and C together to the total sales of the same companies ?**
   A)4:5
   B)5:4
   C)5:2
   D)2:3
   E)None of these

   Answer

   Answer -B) 5:4
   Explanation :
   P = 900+600 = 1500
   S = 800+400 = 1200
   P : S = 1500 : `1200 = 5:4

4. **The total unit sold by D ,E ,F together is approximately what percentage of the total units produced by these companies ?**
   A)72%
   B)72.12%
   C)72.22%
   D)72.72%
   E)73.67%

   Answer

   Answer -D) 72.72%
   Explanation :
   S = 300+700+600 = 1600
   P = 400+1000+800 = 2200
   S/P = (1600×100)/2200 = 72.72%

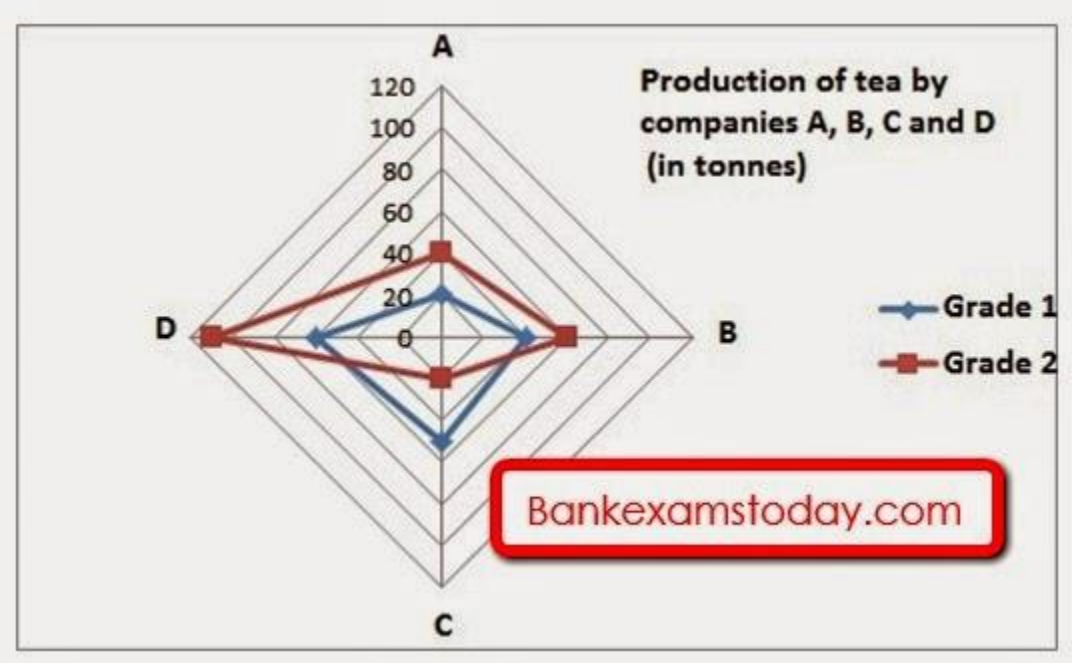

5. **What is the ratio of total production of all the companies to the total sales of all the companies ?**
   A)4:3
   B)3:4
   C)3:2

D)2:3
E)None of these

Answer

Answer -A) 4:3
Explanation :
P = 700+900+600+400+1000+800 = 4400
S = 500+800+400+300+700+600 = 3300
P:S = 4400 : 3300 = 4: 3

Radar Graph questions set.

Use the given data to answer the following questions.

Grade	Rate/Tonne
1	Rs.75,000
2	Rs.60,000

1. What is the difference between the average sales of grade 1 and 2 in all 4 companies?

a. 5 tonnes

b. 10 tonnes
c. 15 tonnes
d. 20 tonnes
e. 25 tonnes

2. What is the difference between the total income of companies C and A?
a. Rs. 1.05 million
b. Rs. 10.05 million
c. Rs.1005 million
d. Rs. 1.05 crores
e. Rs. 10.05 crores

3. In how many companies is the production of grade 2 tea at least 50% more than that of grade 1?
a. 0
b. 1
c. 2
d. 3
e. 4

4. What percentage of the net income of company A is constituted by grade 1 tea?
a. 50%
b. 33.33%
c. 25%
d. 40%
e. 38.46%

5. Total production by company D is what percentage of that of company B?
a. 140%
b. 150%
c. 160%
d. 170%
e. 180%

Solution: 1.c 2.a 3.d 4.e 5.d

1. Average sales of grade 1= (20+40+50+60)/4= 42.5 tonnes
Average sales of grade 2= (40+60+20+110)/4= 57.5 tonnes
Difference= 57.5-42.5= 15 tonnes.

2. Total income of companies A= (75000*20) + (60000*40) = Rs.3900000
Total income of companies C= (75000*50) + (60000*20) = Rs.4950000

Difference= Rs.1050000= Rs. 1.05 million.

3. 3 companies= A, B and D. See the table below.

Company	Grade 1 (tonnes)	Grade 2 (tonnes)
A	20	40
B	40	60
C	50	20
D	60	110

4. Net income of company A= (75000*20)+(40*60000)= Rs.3900000
Grade 1 constitutes 38.46% ((150000/3900000)*100)

5. Total production by company D= 60+110= 170 tonnes
Total production by company B= 40+60= 100 tonnes
Total production by company D is 170 % that of company B. (170/100)*100
