PART-B

1. Manufacturing capability in Asian economies has developed immensely in its refinement, but it remains an extremely multifaceted process subject to everlasting room for improvement. The most important initiative has been the implementation of ISO 9000 standards that have been utilised as quality regulators and error minimisation mechanisms. Nevertheless, the profound emphasis given to refinement results in increased costs approaching those of Western manufacturers which raises questions as to their feasibility.

Implementing ISO 9000 standards has led to a reduced number of errors.

The statement following the passage is:

1. True
2. False
3. Cannot Say

2. A dependable state of peace between two populaces sharing the same region does not imply that the average life expectancy of humans will remain constant. On the other hand, epidemics and natural disasters and unstable weather, particularly in response to the 'greenhouse effect' and the subsequent cooling and warming of affected regions, generate oscillations in mean life expectancy and lead populations to increase or decrease their average age.

Natural disasters are the indisputable cause of life expectancy oscillations.

The statement following the passage is:

1. True
2. False
3. Cannot say

3. Arrange the sentence:
1) A month after colleges opened.....
A. 35% seats reserved under OBC
B. in private colleges
C. for the next academic year
D. remain vacant

1. CBDA
2. CADB
3. ADBC
4. BADC

4. Arrange the sentence:
Panic gripped the people

A. of the village
B. beside the city
C. on Friday
D. after the terrorist attack

1. CABD
2. BACD
3. ABCD
4. ACDB

5. The water tanks may remain empty

A. on Tuesday evening
B. in the city
C. will repair the damaged water pipes
D. as the water supply department

1. BADC
2. BACD
3. DBAC
4. ADCB

6) An advertisement in the newspaper said that

A. fully furnished apartments
B. air-conditioned
C. are available for
D. the gentlemen of taste

1. ABCD
2. DCBA
3. BCDA
4. BACD

7) The shopkeeper

A. whom he had cheated
B. did not listen to the
C. who weighs less
D. protests of customers

1. BDCA
2. CBAD
3. CBDA
4. BDCA

ANSWER KEY:
1. The correct answer is Cannot Say.

We know that ISO 9000 standards have been utilised as an error minimisation mechanism but we do not know if it actually succeeded in reducing the number of errors.
2. The correct answer is False.

According to the text, epidemics, natural disasters, and unstable weather are all responsible for oscillations in mean life expectancy. Therefore, this is not a unique attribute of natural disasters.

There is a difference between stating "an indisputable cause" and "the indisputable cause". The first option implies that it is one factor among a few that affects mean life expectancy, while the second option implies a unique attribute. Also, the word "indisputable" serves as another distracter, making us focus on the adjective, while it is not the main issue here.
3. Answer: B
Explanation: A month after colleges opened for the next academic year 35% seats reserved under OBC remain vacant in private colleges.
4. Answer: C
Explanation: Panic gripped the people of the village beside the city on Friday after the terrorist attack.
5. Answer: A
Explanation: The water tanks may remain empty in the city on Tuesday morning as the water supply department will repair the damaged water pipes.
6. Answer: D
Explanation: An advertisement in the newspaper said that air-conditioned, fully furnished apartments are available for the gentlemen of taste.

7. Answer: C
Explanation: The shopkeeper who weighs less did not listen to the protests of customers whom he had cheated.
