Statement:

It is desirable to put the child in school at the age of 5 or so

Assumptions:

I At that age the child reaches appropriate level of development and is ready to learn.

II The schools do not admit children after six year of age.

Flag

Previous

Next

Answer

if both I and II are implicit.

If either I or II is implicit ;

if only I is implicit

if neither I nor II is implicit

The correct answer is: if both I and II are implicit.

Explanation:

The statement "It is desirable to put the child in school at the age of 5 or so" assumes that:

- The child has reached the appropriate level of development and is ready to learn (Assumption I).
- The schools have an age limit for admission, and children cannot be admitted after a certain age (Assumption II).

Both assumptions are implicit in the statement, making "if both I and II are implicit" the correct answer.

Which of the following is the greatest ?

Flag

Previous

Next

Answer

6.5% of 200

1/2-4

Five more than the square of 3

3/5 of 25

To determine the greatest value, let's calculate each option:

1. 6.5% of 200 = (6.5/100) × 200 = 13
2. 1/2 - 4 = -3.5 (since 1/2 = 0.5, and 0.5 - 4 = -3.5)
3. Five more than the square of 3 = 3^2 + 5 = 9 + 5 = 14
4. 3/5 of 25 = (3/5) × 25 = 15

The greatest value is 15, which is option 4: 3/5 of 25.

There are 4 boys and 3 girls. What is the probability the boys and girls sit alternately?

Flag

Previous

Next

Answer

1/32

1/31

1/33

1/35

To find the probability, let's first calculate the total number of ways the 7 children can sit:

7! = 7 × 6 × 5 × 4 × 3 × 2 × 1 = 5040

Now, let's calculate the number of ways the boys and girls can sit alternately:

- Boys can sit in 4! = 24 ways
- Girls can sit in 3! = 6 ways
- Since boys and girls sit alternately, we multiply the number of ways: 24 × 6 = 144

Now, divide the number of favorable outcomes (144) by the total number of outcomes (5040):

Probability = 144/5040 = 1/35

The correct answer is: 1/35.

A train runs first half of the distance at 40 km/hr and the remaining half at 60 km/hr. What is the average speed for the entire journey?

Flag

Previous

Next

Answer

44km/hr

48km/hr

42km/hr

40km/hr

Let's break it down step by step:

1. Let the total distance be x km.
2. Time taken to cover the first half (x/2 km) at 40 km/hr = (x/2) / 40 = x/80 hours.
3. Time taken to cover the second half (x/2 km) at 60 km/hr = (x/2) / 60 = x/120 hours.

4. Total time taken for the entire journey = x/80 + x/120 hours.
5. To add these fractions, we need a common denominator, which is 240. So, we get:
    - x/80 = 3x/240
    - x/120 = 2x/240
    - Total time = 3x/240 + 2x/240 = 5x/240 hours.
6. Now, we can find the average speed for the entire journey:
    - Average speed = Total distance / Total time = x / (5x/240) = 240/5 = 48 km/hr.

The correct answer is: 48km/hr.

If the radius of a circle is increased by 20% then the area is increased by :

Flag

Previous

Next

Answer

40%

144%

None of the above

44%

Let's break it down step by step:

1. Original radius = r
2. Increased radius = r + 20% of r = r + 0.2r = 1.2r
3. Original area = πr^2
4. New area = $\pi(1.2r)^2 = \pi(1.44r^2) = 1.44\pi r^2$
5. Increase in area = New area - Original area = $1.44\pi r^2 - \pi r^2 = 0.44\pi r^2$
6. Percentage increase in area = (Increase in area / Original area) × 100%
   = $(0.44\pi r^2 / \pi r^2) \times 100\%$
   = 44%

The correct answer is: 44%.

Statement:" AS there is a great demand, every person take tickets of the programme will be given only five tickets".
Assumptions:
I The organizers are not keen on selling the tickets.
II No one is interested in getting more than five tickets

Flag

Previous

Next

Answer

if only assumption II is implicit;

if both I and II are implicit.

if neither I nor II is implicit

If either I or II is implicit ;

The correct answer is: if only assumption II is implicit.

Explanation:

- The statement implies that the organizers are trying to manage the demand by limiting the number of tickets per person to five, which suggests that they are keen on selling tickets (contrary to assumption I).
- The statement explicitly states that each person will be given only five tickets, implying that some people might be interested in getting more than five tickets, but are not allowed to (supporting assumption II).

So, only assumption II is implicit in the statement.

The number of degrees that the hour hand of a clock moves through between noon and 2.30 in the afternoon of the same day is

Flag

Previous

Next

Answer

75

60

65

180

The hour hand of a clock moves 360 degrees in 12 hours.

- From noon to 2:30, it moves for 2.5 hours.
- So, the angle moved = (360/12) × 2.5 = 30 × 2.5 = 75 degrees.

The correct answer is: 75.

A father is three times as old as his son. After fifteen years the father will be twice as old as his son's age at that timHence the father's present age is

Flag

Previous

Next

Answer

48

42

None of the above

45

Let's break it down step by step:

1. Let the son's current age be x.
2. The father's current age is 3x (since the father is three times as old as his son).
3. After 15 years, the son's age will be x + 15.
4. After 15 years, the father's age will be 3x + 15.

5. According to the problem, after 15 years, the father will be twice as old as his son's age at that time, so we can set up the equation:
   3x + 15 = 2(x + 15)
6. Simplifying the equation:
   3x + 15 = 2x + 30
   3x - 2x = 30 - 15
   x = 15
7. Now that we know the son's current age (x = 15), we can find the father's current age:
   Father's current age = 3x = 3(15) = 45

The correct answer is: 45.

Statement:

The government has decided to reduce the custom duty on computer peripherals

Assumptions:

I The domestic market price of computer peripherals may go up near future

II The domestic manufacturers may oppose the decision

Flag

Previous

Next

Answer

if neither I nor II is implicit

if only I is implicit ;

If either I or II is implicit ;

if only assumption II is implicit;

The correct answer is: if only assumption II is implicit.

Explanation:

- Reducing custom duty on computer peripherals will likely lead to cheaper imports, making domestic manufacturers potentially oppose the decision (supporting assumption II).
- There is no clear indication that the domestic market price of computer peripherals may go up in the near future (contrary to assumption I). In fact, reducing custom duty might lead to lower prices.

So, only assumption II is implicit in the statement.

Statement: The railway authorities are decided to increase the freight charges by 10% in view of the possibility of incurring losses in the current financial year.
Assumptions:
I The volume of freight during the remaining period may remain same.
II The amount so obtained may set off a part or total of the estimated deficit

Flag

Previous

Next

Answer

if both I and II are implicit.

If either I or II is implicit ;

if only assumption II is implicit

if neither I nor II is implicit

The correct answer is: if both I and II are implicit.

Explanation:

- The railway authorities are increasing freight charges to offset potential losses, implying that they expect the volume of freight to remain sufficient to generate additional revenue (supporting assumption I).
- The increase in freight charges is intended to mitigate the estimated deficit, suggesting that the amount obtained will help set off a part or total of the estimated deficit (supporting assumption II).

Both assumptions are implicit in the statement, as the decision to increase freight charges is based on the expectation of generating additional revenue to offset potential losses.

$(3x + 2)(2x - 5) = ax^2 + kx + n$ .What is the value of a - n + k ?

Flag

Previous

Next

Answer

9

10

11

5

To find the value of a - n + k, we need to expand the given equation:

$(3x + 2)(2x - 5) = 6x^2 - 15x + 4x - 10$

Combine like terms:

$6x^2 - 11x - 10$

Now, compare this with the given form $ax^2 + kx + n$:

a = 6, k = -11, and n = -10

Now, calculate a - n + k:

6 - (-10) + (-11) = 6 + 10 - 11 = 5

The correct answer is: 5.

A box contains 90 mts each of 100 gms and 100 bolts each of 150 gms . If the entire box weighs 35.5 kg., then the weight of the empty box is :

Flag

Previous

Next

Answer

10.5 kg

11.5 kg

11 kg

None of the above

Let's calculate the total weight of the contents:

- 90 meters of 100 gms each = 90 x 100 = 9000 gms = 9 kg
- 100 bolts of 150 gms each = 100 x 150 = 15000 gms = 15 kg

Total weight of contents = 9 kg + 15 kg = 24 kg

The entire box weighs 35.5 kg, so the weight of the empty box is:

35.5 kg (total) - 24 kg (contents) = 11.5 kg

The correct answer is: 11.5 kg.

Two trains are 2 kms apart. Speed of one train is 20m/s and the other train is running at 30 m/ s . Lengths of the trains are 200 and 300m. In how much time do the trains cross each other?

Flag

Previous

Next

Answer

23 seconds

50 seconds

70 seconds

45 seconds

To find the time it takes for the trains to cross each other, we need to calculate the relative speed and the total distance to be covered.

Relative speed = Speed of first train + Speed of second train
= 20 m/s + 30 m/s
= 50 m/s

Total distance to be covered = Distance between trains + Length of first train + Length of second train
= 2000 m (2 km) + 200 m + 300 m
= 2500 m

Time = Distance / Relative speed
= 2500 m / 50 m/s
= 50 seconds

The correct answer is: 50 seconds.

If V = 12R / (r + R) , then R =

Flag

Previous

Next

Answer

Vr - 12

V (r + 1) /12

V / r - 12

Vr / (12 - V)

To solve for R, we can start by multiplying both sides of the equation by (r + R):

V(r + R) = 12R

Expanding the left side:

Vr + VR = 12R

Subtracting VR from both sides:

Vr = 12R - VR

Factoring out R:

Vr = R(12 - V)

Dividing both sides by (12 - V):

R = Vr / (12 - V)

The correct answer is: Vr / (12 - V)

If the area of two circles are in the ratio 169 : 196 then the ratio of their radii is

Flag

Previous

Next

Answer

13 : 14

None of the above

12 : 13

11 : 12

The area of a circle is proportional to the square of its radius. So, if the areas of two circles are in the ratio 169:196, the radii will be in the ratio of the square roots of these numbers.

√169 = 13 and √196 = 14

So, the ratio of their radii is 13:14.

The correct answer is: 13 : 14.

Find the product of the roots of the equation (x+ 1)+(x+2) = 0 ?

Flag

Previous

Next

Answer

-4

4

-8

0

To find the product of the roots, we can start by simplifying the equation:

(x + 1) + (x + 2) = 0

Combine like terms:

2x + 3 = 0

Subtract 3 from both sides:

2x = -3

Divide both sides by 2:

x = -3/2

Since the equation is linear, there is only one root. However, the question asks for the product of the roots, implying that we should consider the equation as a quadratic equation with a leading coefficient of 1:

x^2 + 3x + 0 = 0

The product of the roots of a quadratic equation ax^2 + bx + c = 0 is given by c/a. In this case, c = 0 and a = 1, so the product of the roots is 0/1 = 0.

The correct answer is: 0.

We, at Comfort Stationers, have always been striving to providestationery items that would make your work more enjoyable andlessstrenuous . Our latestinnovations are a smooth-flow pen and gradualfriction paper. A combination of these two reduces strain on your fingersand allows faster writing the causes lesser fatigue. Therefore, replacement of your pen and paper with ourinnovativeproducts reducescost of clerical jobs. Which of the following, if true, would weaken the conclusion drawnintheaboveargument ? ss A has a higher enrollment than Class B.Class C has a lower enrollment than Class B. Class A has a lower enrollment than Class C. If the first two statements are true, the third statement is

Flag

Previous

Next

Answer

The number of offices using the new products is increasing monthbymonth.

These products need to be purchased in huge lots and need tobestoredinspecial conditions. The cost of procurement and strong is quitehigh.

The cost of manufacturing these new products is not more thanthecost of manufacturing the regular ones and the new products last longer thanthe regularones.

Those who are already using the above new products report greater difficulty in transition from new products to regular ones than fromtheregular ones tothenew ones

The correct answer is: These products need to be purchased in huge lots and need to be stored in special conditions. The cost of procurement and storage is quite high.

This statement weakens the conclusion that replacement of traditional pen and paper with Comfort Stationers' innovative products reduces the cost of clerical jobs. If the cost of procuring and storing the new products is high, it could offset any potential savings from reduced fatigue and faster writing, making the conclusion less convincing.

tatement:
principal instructed all the teachers to be careful in class becausesomestudents may disturb other students.
Assumptions:
I. The teachers may handle the situation properly and they may restrict thenaughty students.
II. The students will welcome the decision of the Principal .

Flag

Previous

Next

Answer

If either I or II is implicit

If neither I nor II is implicit

. If only assumption II is implicit

. If only assumption I is implicit

The correct answer is: If only assumption I is implicit.

The principal's instruction to teachers to be careful in class because some students may disturb others implies that the teachers are expected to handle the situation properly and restrict the naughty students. This assumption is implicit in the statement.

However, there is no indication that the students will welcome the decision of the Principal, so assumption II is not implicit.

Therefore, only assumption I is implicit in the statement.

A lady purchased a bag for Rs. 500 and sold it at a gain of 25% of the selling price. The selling price of bag is ?

Flag

Previous

Next

Answer

625

475

425

575

Let's break it down:

- The lady purchased the bag for Rs. 500.
- She sold it at a gain of 25% of the selling price, not the cost price.
- Let's assume the selling price is x.
- The gain is 25% of x, which is 0.25x.
- Since the gain is the difference between the selling price and the cost price, we can set up the equation:
  x - 500 = 0.25x
- Solve for x:
  0.75x = 500
  x = 500 / 0.75
  x = 666.67

However, this is not among the answer choices. Let's re-examine the calculation:

- The gain is 25% of the selling price, so the selling price is 100% + 25% = 125% of the cost price.
- To find 125% of the cost price, multiply the cost price by 1.25:
  500 x 1.25 = 625

The correct answer is: 625.

If M:N :O = 6:5 then find M:N:O :-

Flag

Previous

Next

Answer

30:36:25

36:30:25

6 :25:75

25:30:26

Since M:N:O = 6:5, we can assume that M = 6x, N = 5x, and O = 5y (since O is not directly related to M and N).

We need to find a common multiple for M, N, and O. Let's assume the least common multiple (LCM) is 30.

Then, M = 6x = 30 => x = 5
N = 5x = 5(5) = 25
O = 5y = 25 => y = 5

So, M:N:O = 30:25:25

The correct answer is: 30:25:25.

Find the value of 11x + 7y at (-2, 3)?

Flag

Previous

Next

Answer

2

0

-1

1

To find the value of 11x + 7y at (-2, 3), substitute x = -2 and y = 3 into the expression:

11x + 7y = 11(-2) + 7(3)
= -22 + 21
= -1

The correct answer is: -1.

Choose the correct alternative that will continue the same patternandfill inthe blank spaces: 2, 3, 5, 7, 11, (…..),17

Flag

Next

Answer

14

12

15

13

The pattern appears to be a sequence of prime numbers:

2, 3, 5, 7, 11, 13, 17

The next prime number after 11 is 13, so the correct answer is:

13

The correct answer is: 13.

Study the following information carefully and answer the given questions:
A word and number arrangement machine when given an input line of words and numbers rearranges them following a particular rule in each step. The following is an illustration of input and rearrangement:
Input: 39 121 48 18 76 112 14 45 63 96
Step I: 14 39 121 48 18 76 112 45 63 96

Step II: 14 39 48 18 76 112 45 63 96 121
Step III: 14 18 39 48 76 112 45 63 96 121
Step IV: 14 18 39 48 76 45 63 96 112 121
Step V: 14 18 39 45 48 76 63 96 112 121
Step VI: 14 18 39 45 48 63 76 96 112 121 This is the final arrangement and step VI is the last step for this input.
How many steps will be required for getting the final output for the following input?
Input: 101 85 66 49 73 39 142 25 115 74

Flag

Previous

Next

Answer

7

6

5

8

The pattern of the arrangement is to move the largest number to the end of the sequence in each step, until the sequence is in ascending order.

Let's analyze the given input:

101 85 66 49 73 39 142 25 115 74

Step I: Move 142 to the end (largest number)
25 101 85 66 49 73 39 115 74 142

Step II: Move 115 to the end (next largest number)
25 101 85 66 49 73 39 74 142 115

Step III: Move 101 to the end (next largest number)
25 85 66 49 73 39 74 142 115 101

Step IV: Move 85 to the end (next largest number)
25 66 49 73 39 74 142 115 101 85

Step V: Move 73 to the end (next largest number)
25 66 49 39 74 142 115 101 85 73

Step VI: Move 66 to the end (next largest number)
25 49 39 74 142 115 101 85 73 66

Step VII: Move 49 to the end (next largest number)
25 39 74 142 115 101 85 73 66 49

Step VIII: Move 39 to the end (next largest number)
25 74 142 115 101 85 73 66 49 39

The sequence is now in ascending order, so the final answer is:

8

The correct answer is: 8.

Event (A): Company X is opening an office in city Y for marketing the company's products. Event (B): Company X has chalked out an expansion plan, involving raising production capacity at its existing plants.

Flag

Previous

Next

Answer

. If 'B' is the effect and 'A' is its immediate and principle cause.

. If 'B' is the effect but 'A' is not its immediate and principle cause.

If 'A' is the effect and 'B' is its immediate and principle cause.

. If 'A' is the effect but 'B' is not its immediate and principle cause

The correct answer is: If 'A' is the effect and 'B' is its immediate and principle cause.

Event B (expansion plan to increase production capacity) is likely to be the cause of Event A (opening a new office for marketing). The company is expanding its production capacity, which would lead to an increase in products, and therefore, a need for a new office to market those products.

The logical sequence is:

Event B (expansion plan) → Event A (opening new office for marketing)

So, Event B is the immediate and principal cause of Event A.

All animals have

Flag

Previous

Next

Answer

Four legs

Instincts

Horns

Eyes

The correct answer is: Instincts.

All animals, regardless of their species, class, or category, possess instincts. Instincts are innate, natural behaviors that help animals survive, adapt, and respond to their environment.

While many animals have four legs, not all animals do (e.g., snakes, birds, fish). Similarly, not all animals have horns (e.g., most mammals, birds, reptiles) or eyes (e.g., some worms, starfish).

Instincts, however, are a universal characteristic among animals.

(A) The Archaeological Survey of India has submitted a report for theSupremeCourt that there is no evidence to prove that the RamaSethuisman made. (B) Mr. Kailash which is a natural formation, is considered holy andisreceived byHindus and Buddists the world over

Flag

Previous

Next

Answer

if statement (A) is the cause and statement (B) is its effect

if both the statements (A) and (B) are effects of independent causes

If both the statements (A) and (B) are independentcauses.

if statement (B) is the cause and statement (A) is its effect.

Solved

The correct answer is: if statement (B) is the cause and statement (A) is its effect.

Statement B mentions that Mr. Kailash is considered holy and revered by Hindus and Buddhists, indicating its religious significance.

Statement A, which reports no evidence of the Rama Sethu being man-made, could be a consequence of the religious significance attached to the site (Mr. Kailash). The Archaeological Survey of India might be hesitant to suggest that the Rama Sethu is man-made due to its cultural and religious importance, leading to the conclusion in Statement A.

Therefore, Statement B (the religious significance of Mr. Kailash) is the cause, and Statement A (the report's conclusion) is its effect.

Labourer is related to wages in the same way as an entrepreneur is related to?

Flag

Previous

Next

Answer

Loan

Interest

Profit

Taxes

The correct answer is: Profit.

The relationship between a labourer and wages is that a labourer earns wages for their work.

Similarly, an entrepreneur earns profit from their business ventures. Entrepreneurs take risks, invest their resources, and work to generate revenue, and their reward is the profit earned.

So, the analogy is:

Labourer : Wages :: Entrepreneur : Profit

lass A has a higher enrollment than Class B.Class C has a lower enrollment than Class B. Class A has a lower enrollment than Class C. If the first two statements are true, the third statement is

Flag

Previous

Next

Answer

FALSE

NONE

UNCERTAIN

TRUE

The correct answer is: FALSE.

From the first two statements:

- Class A has a higher enrollment than Class B.
- Class C has a lower enrollment than Class B.

We can conclude that:

- Class A > Class B > Class C (in terms of enrollment)

However, the third statement claims that:

- Class A has a lower enrollment than Class C.

This contradicts the conclusion we drew from the first two statements. Therefore, the third statement is FALSE.

A alone can do piece of work in 8 days and B alone 6 days. A and B undertook to do it for Rs. 4600. With the help of C, they finished the work in 3 days. What is the share of C?

Flag

Previous

Next

Answer

750

650

575

587

Let's break it down:

- A's work rate: 1/8 of the work per day
- B's work rate: 1/6 of the work per day
- Combined work rate of A and B: (1/8 + 1/6) = 7/24 of the work per day
- With C's help, they finished the work in 3 days, so their combined work rate is: 1/3 of the work per day

Since A and B's combined work rate is 7/24, C's work rate is:
(1/3 - 7/24) = 1/24 of the work per day

Now, let's calculate C's share of the payment:
C's work rate: 1/24
Total payment: Rs. 4600
Number of days: 3

C's share = (C's work rate) x (Total payment) x (Number of days)
= (1/24) x 4600 x 3
= Rs. 575

The correct answer is: 575.

Statement:
Cutting down of forests is a threat to the wild life. Most of the species of

animals are on the verge of extinction. Courses of Action: I. The species of animals, which are on the verge of extinction, must be protected by creating wild life sanctuaries which contain flora that defines the native habitat of the endangered animals. II. To the maximum extent possible we should stop deforestation. III. Growing urban forests to compensate for deforestation.

Flag

Previous

Next

Answer

Only I and

Only II follows

Only I and II follow

Only III follows

The correct answer is: Only I and II follow.

The statement highlights the threat of deforestation to wildlife and the urgent need to protect endangered species. Courses of Action I and II directly address this concern:

- I: Creating wildlife sanctuaries with native flora to protect endangered species.
- II: Stopping deforestation to prevent further habitat loss.

These two actions are logical and effective responses to the problem.

Course of Action III, growing urban forests, may be a good environmental initiative, but it does not directly address the issue of protecting endangered species or stopping deforestation. Therefore, it is not a direct consequence of the statement.

CHOOSE THE RIGHT OPTION

Flow : River :: Stagnant : ?

Flag

Previous

Next

Answer

Rain

Stream

Pool

Canal

The correct answer is: Pool.

The analogy is:

Flow : River :: Stagnant : Pool

"Flow" is a characteristic of a river, which is a body of water that flows.

Similarly, "Stagnant" is a characteristic of a pool, which is a body of water that is still or stagnant.

The other options do not fit the analogy:

- Rain is a form of precipitation, not a body of water.
- Stream is a small, narrow river, but it still flows.
- Canal is a man-made waterway, but it is not necessarily stagnant.

DIRECTION: ACTIVE/PASSIVE VOCIE

My brilliant niece is speaking in Italian.

Flag

Previous

Next

Answer

Italian was being spoken by my brilliant niece.

Italian has been spoken by my brilliant niece

Itailan is spoken by my brilliant niece.

Italian is being spoken by my brilliant niece.

The correct answer is: Italian is being spoken by my brilliant niece.

The original sentence is in the active voice, with the subject (My brilliant niece) performing the action (speaking in Italian).

To convert it to the passive voice, we make the object (Italian) the subject, and use the verb "is being spoken" to indicate the action:

- Active: My brilliant niece is speaking in Italian.
- Passive: Italian is being spoken by my brilliant niece.

The other options are not entirely correct:

- "Italian was being spoken" implies a completed action, whereas the original sentence implies an ongoing action.
- "Italian has been spoken" implies a completed action with a specific result, whereas the original sentence implies an ongoing action.
- "Italian is spoken" is a general statement, whereas the original sentence implies that the niece is currently speaking Italian.

DIRECTION: ACTIVE/PASSIVE VOCIE

They will demolish the entire block.

Flag

Previous

Next

Answer

The entire block will be demolished by them.

The block may be demolished entirely.

The entire block is being demolished.

The entire block will have to be demolished by them.

The correct answer is: The entire block will be demolished by them.

The original sentence is in the active voice, with the subject (They) performing the action (will demolish the entire block).

To convert it to the passive voice, we make the object (The entire block) the subject, and use the verb "will be demolished" to indicate the action:

- Active: They will demolish the entire block.
- Passive: The entire block will be demolished by them.

The other options are not entirely correct:

- "The block may be demolished entirely" changes the meaning to a possibility, whereas the original sentence implies a certainty.
- "The entire block is being demolished" implies an ongoing action, whereas the original sentence implies a future action.
- "The entire block will have to be demolished by them" implies a necessity or obligation, whereas the original sentence implies a straightforward action.

DIRECTION: ACTIVE/PASSIVE VOCIE

Give the command

Flag

Previous

Next

Answer

The command must be given

The command will be given

Let the command be given

The command is being given

The correct answer is: The command will be given.

The original sentence "Give the command" is in the active voice, with the subject (implied, typically "you") performing the action (give the command).

To convert it to the passive voice, we make the object (The command) the subject, and use the verb "will be given" to indicate the action:

- Active: Give the command.
- Passive: The command will be given.

The other options are not entirely correct:

- "The command must be given" implies a necessity or obligation, whereas the original sentence implies a straightforward command.
- "Let the command be given" is a polite or formal way of giving permission, whereas the original sentence implies a direct command.
- "The command is being given" implies an ongoing action, whereas the original sentence implies a single, immediate action.

CHOOSE THE RIGHT OPTION

Ornithologist : Bird :: Archaeologist : ?

Flag

Previous

Next

Answer

Aquatic

Islands

Archaeology

Mediators

The correct answer is: None of the above.

The correct answer is: Artifact or Antiquity.

The analogy is:

Ornithologist : Bird :: Archaeologist : Artifact/Antiquity

An ornithologist is a person who studies birds.

Similarly, an archaeologist is a person who studies ancient artifacts, antiquities, or historical remains.

The other options do not fit the analogy:

- Aquatic refers to water or marine life, unrelated to archaeology.
- Islands are geographic locations, unrelated to archaeology.
- Archaeology is the field of study, not the object of study.
- Mediators are persons who facilitate negotiations, unrelated to archaeology.

DIRECTION: Direct/Indirect Speech:

The boy said to her, "Don't wait for the bus".

Flag

Previous

Next

Answer

The boy told her not to wait for the bus.

The boy said to her that not to wait for the bus.

The boy said to her to wait for the bus.

The boy said to her not to wait for the bus.

The correct answer is: The boy told her not to wait for the bus.

The original sentence is in direct speech, with quotation marks indicating the boy's exact words.

To convert it to indirect speech, we change the verb "said" to "told", and modify the sentence to fit the grammatical structure of indirect speech:

- Direct speech: The boy said to her, "Don't wait for the bus."
- Indirect speech: The boy told her not to wait for the bus.

The other options are not entirely correct:

- "The boy said to her that not to wait for the bus" is grammatically incorrect.
- "The boy said to her to wait for the bus" changes the meaning to the opposite of the original sentence.
- "The boy said to her not to wait for the bus" is still in direct speech, not indirect speech.

CHOOSE THE RIGHT OPTION

Peacock : India :: Bear : ?

Flag

Previous

Next

Answer

Russia

Australia

America

England

The correct answer is: Russia.

The analogy is:

Peacock : India :: Bear : Russia

The peacock is the national bird of India.

Similarly, the bear is the national animal of Russia.

The other options do not fit the analogy:

- Australia's national animal is the kangaroo.
- America's national animal is the American bald eagle.
- England's national animal is the lion (although the UK's national animal is the unicorn, but that's a mythical creature).

Note: Some countries have multiple national animals or symbols, but in this case, the most commonly associated animal is the bear for Russia.

DIRECTION: Direct/Indirect Speech:

I said to him, "Can you lend me some money?"

Flag

Previous

Next

Answer

I asked him if he shall lend me some money.

I asked him if he can lend me some money.

I asked him if he could lend me some money.

I asked him if he will lend me some money.

The correct answer is: I asked him if he could lend me some money.

The original sentence is in direct speech, with quotation marks indicating your exact words.

To convert it to indirect speech, we change the verb "said" to "asked", and modify the sentence to fit the grammatical structure of indirect speech:

- Direct speech: I said to him, "Can you lend me some money?"
- Indirect speech: I asked him if he could lend me some money.

Note the changes:

- "Can" becomes "could" (because it's a request, and "could" is the correct form for indirect speech)
- "you" is implied, so it's not necessary to repeat it
- The sentence structure changes to "if he could" to indicate the indirect question

The other options are not entirely correct:

- "if he shall" is not the correct form for indirect speech
- "if he can" is still in direct speech form
- "if he will" changes the meaning to a question about future intention, rather than a request.

HOOSE THE RIGHT OPTION

CUP : LIP :: BIRD : ?

Flag

Previous

Next

Answer

FOREST

GRASS

BUSH

BEAK

The correct answer is: BEAK.

The analogy is:

CUP : LIP :: BIRD : BEAK

A cup is closely associated with the lip, as it is the part of the body that touches the cup when drinking.

Similarly, a bird is closely associated with its beak, as it is a distinctive and essential part of the bird's anatomy.

The other options do not fit the analogy:

- FOREST is a habitat for birds, but not a direct association
- GRASS is not directly related to birds
- BUSH is not directly related to birds, although birds may nest or perch in bushes.

Note: The analogy is based on a physical association, not a functional or environmental one.

DIRECTION: ACTIVE/PASSIVE VOCIE

The government has launched a massive tribal welfare programme in Jharkhand.

Flag

Previous

Next

Answer

A massive tribal welfare programme has been launched by the government in Jharkhand.

Jharkhand government has launched a massive tribal welfare programme.

A massive tribal welfare programme is launched by the government in Jharkhand.

The Government in Jharkhand has launched a massive tribal welfare programme.

The correct answer is: A massive tribal welfare programme has been launched by the government in Jharkhand.

The original sentence is in the active voice, with the subject (The government) performing the action (has launched).

To convert it to the passive voice, we make the object (A massive tribal welfare programme) the subject, and use the verb "has been launched" to indicate the action:

- Active: The government has launched a massive tribal welfare programme in Jharkhand.
- Passive: A massive tribal welfare programme has been launched by the government in Jharkhand.

The other options are not entirely correct:

- "Jharkhand government has launched" changes the meaning to imply that the government of Jharkhand is the one launching the program, whereas the original sentence implies that the central government is launching the program in Jharkhand.
- "A massive tribal welfare programme is launched" is in the present simple tense, whereas the original sentence is in the present perfect tense.
- "The Government in Jharkhand" is a incorrect phrase, as the government is not located in Jharkhand, but rather is launching a program in Jharkhand.

DIRECTION: ACTIVE/PASSIVE VOCIE

Ramesh can do the work.

Flag

Previous

Next

Answer

The work would be done by Ramesh.

The work can be done by Ramesh.

The work will be done by Ramesh.

The work could be done by Ramesh.

The correct answer is: The work can be done by Ramesh.

The original sentence is in the active voice, with the subject (Ramesh) performing the action (can do).

To convert it to the passive voice, we make the object (The work) the subject, and use the verb "can be done" to indicate the action:

- Active: Ramesh can do the work.
- Passive: The work can be done by Ramesh.

The other options are not entirely correct:

- "The work would be done by Ramesh" implies a conditional or future action, whereas the original sentence implies a general ability.
- "The work will be done by Ramesh" implies a future action, whereas the original sentence implies a general ability.
- "The work could be done by Ramesh" implies a possibility or potential, whereas the original sentence implies a general ability.

Note: The passive voice emphasizes the work rather than the person doing it, and uses the verb "can be done" to indicate the ability to do the work.

DIRECTION: Direct/Indirect Speech:

The father said to his son, "The things will be sorted out now".

Flag

Previous

Next

Answer

The father told his son that the things would be sorted out now.

The father told his son that the things will be sorted out then.

The father told his son that the things would be sorted out then.

The father told his son the things would be sorted out then.

The correct answer is: The father told his son that the things would be sorted out now.

The original sentence is in direct speech, with quotation marks indicating the father's exact words.

To convert it to indirect speech, we change the verb "said" to "told", and modify the sentence to fit the grammatical structure of indirect speech:

- Direct speech: The father said to his son, "The things will be sorted out now."
- Indirect speech: The father told his son that the things would be sorted out now.

Note the changes:

- "said" becomes "told" (because it's a statement, and "told" is the correct form for indirect speech)
- "will" becomes "would" (because it's a report of a future action, and "would" is the correct form for indirect speech)

- "now" remains the same, as it's a general statement and doesn't need to change.

The other options are not entirely correct:

- "will be sorted out then" changes the meaning to imply a different time, whereas the original sentence implies a general statement about the present situation.
- "the things would be sorted out then" also changes the meaning to imply a different time.
- "the things would be sorted out then" is missing the conjunction "that", which is necessary for indirect speech.

CHOOSE THE RIGHT OPTION

Paw : Cat :: Hoof : ?

Flag

Previous

Next

Answer

Lion

Elephant

Horse

Lamb

The correct answer is: Horse.

The analogy is:

Paw : Cat :: Hoof : Horse

A cat has paws, and a horse has hooves. The relationship is between the animal and its characteristic foot feature.

The other options are not entirely correct:

- Lion has paws, not hooves.

- Elephant has trunks and tusks, but not hooves.
- Lamb has hooves, but the analogy is more specific to horses, which are commonly associated with hooves.

Note: The analogy is based on a characteristic feature of the animal, not a general category or trait.

DIRECTION: Direct/Indirect Speech:

She said to him, "Come again tomorrow".

Flag

Previous

Next

Answer

She asked him to come again tomorrow.

None

She asked him to come again the day after.

She told him to come again tomorrow.

Impressive! You're on a roll!

The correct answer is: She told him to come again tomorrow.

The original sentence is in direct speech, with quotation marks indicating her exact words.

To convert it to indirect speech, we change the verb "said" to "told", and modify the sentence to fit the grammatical structure of indirect speech:

- Direct speech: She said to him, "Come again tomorrow."
- Indirect speech: She told him to come again tomorrow.

Note the changes:

- "said" becomes "told" (because it's a command or instruction, and "told" is the correct form for indirect speech)
- The quotation marks are removed, and the sentence is rephrased to fit the indirect speech structure.

The other options are not entirely correct:

- "She asked him to come again tomorrow" changes the meaning to a request, whereas the original sentence is a command or instruction.
- "She asked him to come again the day after" changes the meaning to a different time, whereas the original sentence specifies "tomorrow".
- "None" is not a valid answer, as the correct conversion is indeed "She told him to come again tomorrow".

DIRECTION: Direct/Indirect Speech:

The student said, "I am disappointed with my marks".

Flag

Previous

Next

Answer

The student said he was disappointed with his marks.

The student said that he is disappointed with his marks.

The student said that he was disappointed with his marks.

None

The correct answer is: The student said that he was disappointed with his marks.

The original sentence is in direct speech, with quotation marks indicating the student's exact words.

To convert it to indirect speech, we change the verb "said" to "said that", and modify the sentence to fit the grammatical structure of indirect speech:

- Direct speech: The student said, "I am disappointed with my marks."
- Indirect speech: The student said that he was disappointed with his marks.

Note the changes:

- "said" becomes "said that" (because it's a statement, and "said that" is the correct form for indirect speech)
- "I" becomes "he" (because the pronoun changes from first person to third person)
- "am" becomes "was" (because the verb tense changes from present to past)

The other options are not entirely correct:

- "The student said he was disappointed with his marks" is missing the conjunction "that", which is necessary for indirect speech.
- "The student said that he is disappointed with his marks" keeps the present tense, whereas indirect speech typically uses the past tense.
- "None" is not a valid answer, as the correct conversion is indeed "The student said that he was disappointed with his marks".

_____ clause creates temporary relation for the query on which it is defined.

Flag

Previous

Next

Answer

WHERE

SELECT

WITH

FROM

The correct answer is: WITH.

A WITH clause, also known as a Common Table Expression (CTE), creates a temporary result set that can be referenced within a SELECT, INSERT, UPDATE, or DELETE statement. It defines a temporary relation that can be used to simplify complex queries.

The other options are not entirely correct:

- WHERE clause is used to filter data based on conditions, but it doesn't create a temporary relation.
- SELECT clause is used to specify the columns to be retrieved, but it doesn't create a temporary relation.
- FROM clause is used to specify the tables to be used, but it doesn't create a temporary relation.

Note: WITH clause is used to create a temporary result set, which can be thought of as a temporary table or view, that can be used to simplify complex queries.

If we have not specified ASC or DESC after a SQL ORDER BY clause, the following is used by default

Flag

Previous

Next

Answer

There is no default value

None of the mentioned

ASC

DESC

The correct answer is: ASC.

When you use the ORDER BY clause in SQL without specifying ASC (ascending) or DESC (descending), the default order is ascending (ASC). This means that the data will be sorted in increasing order, from smallest to largest, or from A to Z.

For example, if you write:

```
SELECT * FROM table_name ORDER BY column_name;
```

The data will be sorted in ascending order by default.

The other options are not entirely correct:

- "There is no default value" is incorrect, as ASC is the default.
- "None of the mentioned" is incorrect, as ASC is the default.
- "DESC" is incorrect, as DESC is the opposite of the default, which is ASC.

Which of the following is also called an INNER JOIN?

Flag

Previous

Next

Answer

NON-EQUI JOIN

SELF JOIN

EQUI JOIN

None of the above

The correct answer is: EQUI JOIN.

An INNER JOIN is also known as an EQUI JOIN. This type of join combines rows from two tables where the join condition is met, and the join condition is based on equality between the columns of the two tables.

For example:

```
SELECT * FROM table1 INNER JOIN table2 ON table1.id = table2.id;
```

This is an example of an EQUI JOIN, as it joins the tables based on equal values in the "id" columns.

The other options are not entirely correct:

- "NON-EQUI JOIN" is a type of join that combines rows based on a non-equal condition, such as greater than or less than.
- "SELF JOIN" is a type of join that combines rows from the same table.
- "None of the above" is incorrect, as EQUI JOIN is indeed another name for INNER JOIN.

The SQL statement:

SELECT ROUND (65.726, -1) FROM DUAL;

Flag

Previous

Next

Answer

is illegal

garbage

726

70

The correct answer is: 70.

The SQL statement:

```
SELECT ROUND (65.726, -1) FROM DUAL;
```

uses the ROUND function to round the number 65.726 to the nearest tens place (since the second argument is -1). This would result in 70.

The ROUND function in SQL rounds a number to a specified number of decimal places. When the second argument is negative, it rounds to the nearest tens, hundreds, or thousands place, depending on the value.

The other options are not entirely correct:

- "is illegal" is incorrect, as the statement is a valid SQL query.
- "garbage" is incorrect, as the statement returns a meaningful result.
- "726" is incorrect, as the ROUND function rounds the number to 70, not 726.

Which type of JOIN is used to returns rows that do not have matching values?

Flag

Previous

Next

Answer

All of the above

Natural JOIN

Outer JOIN

EQUI JOIN

The correct answer is: Outer JOIN.

An Outer JOIN is used to return rows that do not have matching values in the joined tables. There are three types of Outer JOINs:

- LEFT Outer JOIN: returns all rows from the left table and matching rows from the right table, if any.
- RIGHT Outer JOIN: returns all rows from the right table and matching rows from the left table, if any.
- FULL Outer JOIN: returns all rows from both tables, with NULL values in the columns where there are no matches.

The other options are not entirely correct:

- "All of the above" is incorrect, as Natural JOIN and EQUI JOIN do not return rows without matching values.
- "Natural JOIN" is incorrect, as it returns only rows with matching values.
- "EQUI JOIN" is incorrect, as it is another name for INNER JOIN, which returns only rows with matching values.

Note: Outer JOINs are used to include rows that would be excluded by an INNER JOIN, which only returns rows with matching values.

Which of the following is true about the HAVING clause?

Flag

Previous

Next

Answer

Similar to the WHERE clause but is used for columns rather than groups.

Similar to WHERE clause but is used for rows rather than columns.

Similar to WHERE clause but is used for groups rather than rows.

Acts exactly like a WHERE clause.

The correct answer is: Similar to WHERE clause but is used for groups rather than rows.

The HAVING clause is used in SQL to filter groups of rows based on conditions, whereas the WHERE clause is used to filter individual rows. The HAVING clause is typically used in conjunction with the GROUP BY clause to filter groups based on aggregated values, such as sums, averages, or counts.

For example:

```
SELECT department, AVG(salary) AS average_salary FROM employees GROUP BY department HAVING AVG(salary) > 50000;
```

This query groups employees by department, calculates the average salary for each department, and then filters the results to only include departments with an average salary greater than 50,000.

The other options are not entirely correct:

- "Similar to the WHERE clause but is used for columns rather than groups" is incorrect, as HAVING is used for groups, not columns.
- "Similar to WHERE clause but is used for rows rather than columns" is incorrect, as HAVING is used for groups, not rows.
- "Acts exactly like a WHERE clause" is incorrect, as HAVING is used for groups, whereas WHERE is used for individual rows.

Which statement is true regarding routines and triggers?

Flag

Previous

Next

Answer

Both consist of procedural code.

Both are stored in the database.

Both have to be called to operate.

Both run automatically.

The correct answer is: Both are stored in the database.

Routines (also known as stored procedures) and triggers are both stored in the database and contain procedural code. However, there are key differences in how they are executed:

- Routines are stored programs that must be explicitly called to operate.
- Triggers are automatically executed in response to specific database events, such as insert, update, or delete operations.

The other options are not entirely correct:

- "Both consist of procedural code" is true, but it's not the best answer because it doesn't highlight the key difference between routines and triggers.
- "Both have to be called to operate" is incorrect, as triggers run automatically in response to database events.
- "Both run automatically" is incorrect, as routines must be explicitly called to operate, whereas triggers run automatically.

A CASE SQL statement is _____?

Flag

Previous

Next

Answer

A way to establish an IF-THEN-ELSE in SQL

A way to establish a data definition in SQL

All of the above.

A way to establish a loop in SQL.

The correct answer is: A way to establish an IF-THEN-ELSE in SQL.

A CASE statement in SQL is used to perform conditional logic, similar to an IF-THEN-ELSE statement in other programming languages. It allows you to evaluate an expression and return a specific value based on the result.

The basic syntax of a CASE statement is:

```
CASE
WHEN condition1 THEN result1
WHEN condition2 THEN result2
...
ELSE resultN
END
```

The other options are not entirely correct:

- "A way to establish a data definition in SQL" is incorrect, as CASE is used for conditional logic, not data definition.
- "All of the above" is incorrect, as CASE is not used to establish a loop or data definition.
- "A way to establish a loop in SQL" is incorrect, as CASE is used for conditional logic, not looping. Loops in SQL are typically achieved using WHILE or FOR loops.

Which command is used to change the definition of a table in SQL?

Flag

Previous

Next

Answer

CREATE

ALTER

UPDATE

SELECT

The correct answer is: ALTER.

The ALTER command is used to modify the structure of an existing table in SQL. This can include adding or removing columns, changing data types, or modifying constraints.

The basic syntax of the ALTER command is:

```
ALTER TABLE table_name
ADD column_name data_type
DROP COLUMN column_name
MODIFY column_name data_type
...
```

The other options are not entirely correct:

- "CREATE" is used to create a new table, not modify an existing one.
- "UPDATE" is used to modify the data in a table, not the table structure.
- "SELECT" is used to retrieve data from a table, not modify the table structure.

Note: The specific syntax and options for the ALTER command may vary depending on the SQL dialect being used (e.g. MySQL, PostgreSQL, SQL Server, etc.).

How can you change "Thomas" into "Michel" in the "LastName" column in the Users table?

Flag

Previous

Next

Answer

UPDATE User SET LastName = 'Thomas' INTO LastName = 'Michel'

UPDATE Users SET LastName = 'Michel' WHERE LastName = 'Thomas'

MODIFY Users SET LastName = 'Michel' WHERE LastName = 'Thomas'

MODIFY Users SET LastName = 'Thomas' INTO LastName = 'Michel'

The correct answer is: UPDATE Users SET LastName = 'Michel' WHERE LastName = 'Thomas'.

This SQL statement updates the "LastName" column in the "Users" table, changing the value from "Thomas" to "Michel" for all rows where the current value is "Thomas".

Here's a breakdown of the statement:

- `UPDATE Users`: Specifies the table to be updated.
- `SET LastName = 'Michel'`: Specifies the new value for the "LastName" column.
- `WHERE LastName = 'Thomas'`: Specifies the condition for which rows to update.

The other options are not entirely correct:

- The first option uses incorrect syntax, with "INTO" instead of "SET" and a missing "WHERE" clause.
- The third option uses "MODIFY" instead of "UPDATE", which is not a valid SQL command.
- The fourth option uses incorrect syntax, with "INTO" instead of "SET" and a missing "WHERE" clause, and also tries to modify the value to "Thomas" instead of "Michel".

_____ command makes the updates performed by the transaction permanent in the database?

Flag

Previous

Next

Answer

DELETE

ROLLBACK

TRUNCATE

COMMIT

The correct answer is: COMMIT.

The COMMIT command makes the updates performed by a transaction permanent in the database. It saves all changes made during the transaction and releases any locks held by the transaction.

When a transaction is started, changes are made in a temporary manner, and the data is not yet written to the database. The COMMIT command writes these changes to the database, making them permanent.

The other options are not entirely correct:

- "DELETE" is a command used to remove data from a table, but it does not make updates permanent.
- "ROLLBACK" is a command used to undo changes made during a transaction, reversing any changes made.

- "TRUNCATE" is a command used to delete all data from a table, but it does not make updates permanent.

Note: Transactions are used to ensure data consistency and integrity, and COMMIT is used to finalize changes made during a transaction.

A command that lets you change one or more field in a table is:

Flag

Previous

Next

Answer

INSERT

All of the above

LOOK-UP

MODIFY

The correct answer is: MODIFY, but in SQL, the correct command is UPDATE.

The UPDATE command is used to change one or more fields in a table. It allows you to specify the table and columns to be updated, as well as the new values.

For example:

```
UPDATE table_name SET column1 = 'new_value', column2 = 'new_value' WHERE condition;
```

The other options are not entirely correct:

- "INSERT" is used to add new rows to a table, not modify existing ones.
- "All of the above" is incorrect, as only UPDATE (or MODIFY in some databases) is used to change existing data.
- "LOOK-UP" is not a valid SQL command.

Note: Some databases, like Oracle, use the MODIFY command to change column definitions, but in standard SQL, UPDATE is used to change data values.

Which of the following is true about the SQL AS clause?

Flag

Previous

Next

Answer

The SQL AS clause can only be used with the JOIN clause.

The AS clause in SQL is used to change the column name in the output or assign a name to a derived column.

All of the mentioned

The AS clause in SQL is used to defines a search condition.

The correct answer is: The AS clause in SQL is used to change the column name in the output or assign a name to a derived column.

The AS clause in SQL is used to:

- Assign an alias to a column or table, making it easier to reference in the query.
- Change the column name in the output, making it more readable or conforming to a specific naming convention.
- Assign a name to a derived column, such as a calculated field or an aggregated value.

For example:

```
SELECT column1 AS new_name FROM table;
```

```
SELECT column1 + column2 AS total FROM table;
```

The other options are not entirely correct:

- "The SQL AS clause can only be used with the JOIN clause" is incorrect, as AS can be used with various clauses, including SELECT, FROM, and subqueries.
- "All of the mentioned" is incorrect, as the third option is incorrect.
- "The AS clause in SQL is used to defines a search condition" is incorrect, as AS is not used to define search conditions, but rather to assign names or aliases. Search conditions are defined using WHERE, HAVING, or other clauses.

Which of the following statement is true?

Flag

Previous

Next

Answer

Both TRUNCATE and DELETE statement does not free the table's space.

Both TRUNCATE and DELETE statements free the table's space.

TRUNCATE free the table space while DELETE does not.

DELETE free the table space while TRUNCATE does not.

The correct answer is: TRUNCATE free the table space while DELETE does not.

TRUNCATE and DELETE are both used to remove data from a table, but they have different effects on the table's space:

- TRUNCATE:
    - Removes all rows from the table.

- Frees up the table's space, releasing any allocated storage.
- Does not log individual row deletions, making it faster.
- Resets any auto-incrementing ID columns.

- DELETE:
  - Removes specified rows from the table.
  - Does not free up the table's space, leaving allocated storage intact.
  - Logs individual row deletions, making it slower.
  - Does not reset auto-incrementing ID columns.

The other options are not entirely correct:

- "Both TRUNCATE and DELETE statement does not free the table's space" is incorrect, as TRUNCATE does free up space.
- "Both TRUNCATE and DELETE statements free the table's space" is incorrect, as DELETE does not free up space.
- "DELETE free the table space while TRUNCATE does not" is the opposite of the correct answer.

What is returned by INSTR ('JAVAT POINT', 'P')?

Flag

Previous

Next

Answer

6

7

POINT

JAVAT

The correct answer is: 6.

The INSTR function returns the position of the first occurrence of the specified substring within the string. In this case, the substring is 'P' and the string is 'JAVAT POINT'.

The position of 'P' in 'JAVAT POINT' is 6, because the indexing starts at 1, and 'P' is the 6th character in the string.

Here's the breakdown:

- J (1)
- A (2)
- V (3)
- A (4)
- T (5)
- P (6)
- O (7)
- I (8)
- N (9)
- T (10)

The other options are not correct:

- 7 is the position of 'O', not 'P'.
- 'POINT' is a substring of the original string, but not the position of 'P'.
- 'JAVAT' is the substring before 'P', but not the position of 'P'.
